

ANDREW JOHNSON – TRYING TO CHECK THE EVIDENCE!

Andrew Johnson grew up in Yorkshire, England and graduated from Lancaster University in 1986 with a degree in Computer Science and Physics. He has mainly worked in Software Engineering and Software Development, for most of the last 20 years. He has also worked full and part time in lecturing and tutoring (in Adult Education). Now he works for the Open University (part time) tutoring and assessing students, whilst occasionally working freelance on various small software development projects.

He became interested in “alternative knowledge” in 2003, soon after discovering Dr Steven Greer's Disclosure Project. He has given presentations and written and posted a number of articles on various websites about 9/11, Mars, Chemtrails and Anti-gravity research, whilst also challenging some of the authorities to address some of the most compelling data that is available. His website is www.checktheevidence.com.

I have included further info about equipment and expenses at the end.

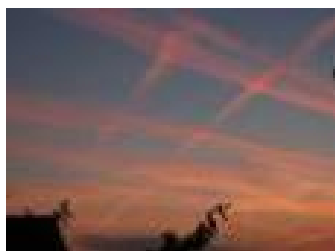

1. A Mystery in the Fields

the events of 9/11?

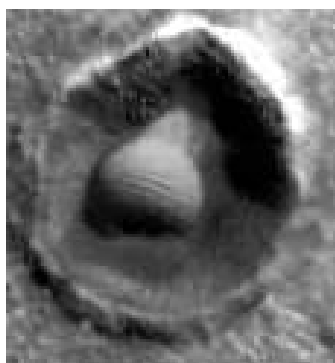

Looking at the research of Colin Andrews, Freddy Silva, Ed and Chris Sherwood and others, we will try to get a good overview of the crop circle phenomenon and look at the evidence which suggests that they are made by an number of different “agencies”. What was the message in the “Alien Head” formation? Did one formation appear to be a response to a message sent out by the Arecibo Radio Telescope in 1974? What can we conclude about the phenomenon? What is the connection between crop circles and

2. Chemtrails in Plain Sight

In recent years, the issues of supposed "Climate Change" and "Global Warming" have been thrust upon us from all directions. Because the weather is so important to us all, we should look carefully at the skies - and we should avail ourselves of some facts. Is someone modifying the weather? Can it be true that so many people are blind to something being done in "plain sight"? Look at the evidence and decide for yourself.

3. Mars, Pyramids and Changes in the Solar System

Some people say there is life on Mars - some of them are scientists who have worked for NASA. This presentation looks at some of the NASA photos and data which suggest there may be life on Mars. In most cases, NASA will not discuss what is shown on some of these photos - discussion and analysis is left to independent researchers like Richard Hoagland and David Wilcock. They suggest there are links between structures on Mars and the Pyramids in Egypt. Is this true, or this is just a fantasy? Come and look at the evidence for yourself and make your own mind up...

4. “The Case for Antigravity”

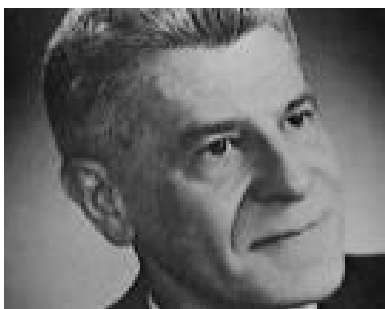

Just imagine the difference working antigravity technology would make to our world - perhaps almost effortless travel - at enormous speed. In this presentation, we ask has working antigravity technology been developed? Is it already in use? We take a look at the evidence from the last 100 years (arguably longer) and consider the reasons for what looks like a comprehensive cover up. In the process we will cover the experiments of Thomas Townsend Brown and John Hutchison and the incredible Coral Castle and the secret Aurora Aircraft development Programme.

5. 9/11 - Finding the Truth

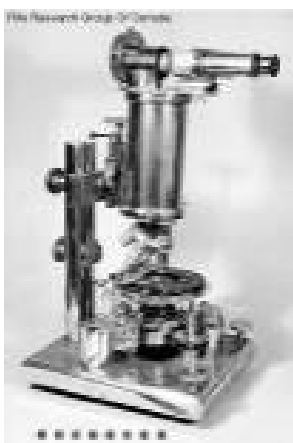

Many people around the world are now realising that the official story of 9/11 is almost completely false. In this presentation, we will look at the evidence as to why the story is false, but we will also look at how some elements of the “9/11 Truth Movement” seem to be trying to cover up a secret which has the potential to transform the future of mankind. How was the WTC really destroyed and why was Hurricane Erin closest to NYC at about 8am on 9/11? A look at the evidence tells us what happened and, to an extent, how the WTC was destroyed. Through the evidence uncovered by Dr Judy Wood, we will discover the connection between energy and 9/11.

6. Wilbert Smith and the Origins of ET Disclosure

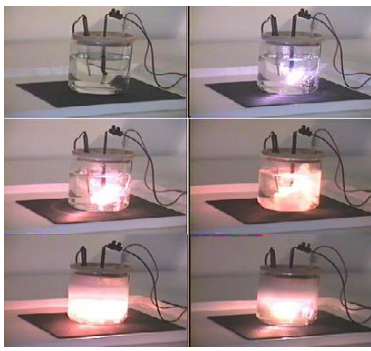

This presentation will look at the incredible work of Canadian Radio Engineer, Wilbert Brockhouse Smith, who, over a period of 12 years, went from being a UFO/ET Sceptic to building working items of technology under the instruction of "The Boys Topside". This fascinating story encompasses many of the phenomena which other UFO figures and researchers have discovered and discussed – and it is a story which most people have never heard. Additionally, we will look at documents from the Douglas Aircraft company, which show they were seriously investigating UFOs in the 1960's. Also, recent developments in UFO disclosure will be analysed.

7. Healthy Scepticism

In this presentation, we will attempt to look at the general health cover up which has been in operation for about 100 years. We will touch on - Programmes and substances designed to deliberately harm health such as most or all vaccinations. We will look at AIDS and Cancer and some of the suppressed information about them. We will look at the evidence that the 2009 Swine Flu scare was just a scam. Then we will look at cheap, effective treatments/cures for cancer and why they have been suppressed. Additionally, we will look at an effective dietary treatment for diabetes. Also included are the “Energy medicine” techniques such as those developed by Royal Rife. Finally, we will touch on other forms of healing such as Matrix Energetics.

8. Infinite Energy - but not for the masses...

In this presentation, we will look at the evidence for the cover up of “free energy”. Looking around us, we can see fantastic advances in many areas of technology – yet in ground transportation, we are still “stuck” with decades old internal combustion engine technology which has not progressed much. Is there an alternative to burning fossil fuels? Radiant Energy, Cold Fusion, Magnetic Motors - can we exploit “vacuum energy” and “get more out than we put in”? A look at the evidence tells us that we can, but it also tells us why this is not currently “allowed”.

9. Apollo – “Removing Truth’s Protective Layers”

In this presentation, we will look at the evidence which suggests that the Apollo "Moonshot" Programme, as presented to the public, could not have landed men on the moon. We will try to consider a wide range of evidence such as some of the background to the Apollo programme and a review of some aspects of the Apollo technology. We will hear what some of the astronauts themselves have said in relation the moon landings - including statements by Neil Armstrong and Buzz Aldrin. We will look at a range of photographic evidence and anomalies, along with a review of LRO photos claiming to show "Apollo relics" on the moon. We will then consider who might have been involved with producing the fake films that appear to have been used and why the programme was faked, to a large extent.

10. Expanding Consciousness, Enlarging Reality

In this presentation, we will try to consider the nature of consciousness and its fundamental importance. We will consider evidence that our consciousness does not always reside in the physical body – considering the testimony of people who have had near-death experiences. What is the meaning of these experiences? Can an understanding or knowledge of them “expand our reality”?

We will look at some cases of the “idiot savant” syndrome – “the foolish wise ones” – who are able to automatically perform great mental feats.

Looking at the research of people like Rick Strassman, Graham Hancock, Anthony Peake and Dr Gary Schwartz. We will also consider people’s other experiences of altered or expanded consciousness and how there seems to be an effort, in organised western cultures to discourage or prevent us from experiencing these altered states of consciousness.

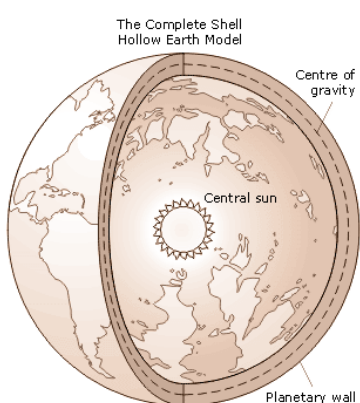

We will also consider how the study of “alternative knowledge” about lost civilisations, aliens and ETs, 9/11 and so on seems to be part and parcel of expanding our consciousness.

11. Strands of Disclosure

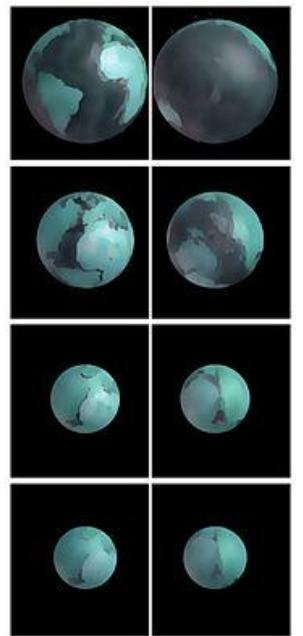

This presentation will look at a number of strands of ET disclosure and how they seem to be woven in to a larger canvas – through a number of individuals who have spoken out on the subject of ETs and UFOs. We will consider aspects of media involvement – particularly in the last 4 years or so.

We will also look at what some of the Apollo and other Astronauts have said. We will mention documents from the McDonnell Douglas aircraft corporation. We will discuss Travis Walton's incredible case (documented in the Police record, with multiple witnesses to many of the events). We will look at some incredible inexplicable footage from Mexico in 2009. We will consider whether some people want Disclosure to happen “in a certain way”, but are there other groups at work who have their own ideas about the disclosure process?

12. The Earth - But Not as We Know It

In this presentation we will examine the evidence that lead some to conclude the earth is hollow. What can we learn from various geological and geo-science anomalies? Is there a possibility that our world is hollow? We will look at some scientific evidence and we will also look at some of the incredible accounts from people such as Olaf Jansen and others. Did Admiral Richard Byrd find “another land” on his polar expeditions? Did either of them find “Giants in the Earth?”

Others such as Neal Adams have also studied quite obvious anomalies which seem to prove that the earth has expanded in the past and is still growing, slowly, in size today. What can this teach us about the physical nature of the planet we all live on. Has Mainstream Science “cheated on us” again?

We will try to navigate between the channels of disinformation and find the truth – on a journey through time and inner space.

13. The Taboo Of Disclosure

In this presentation, we will look at how the technology which caused the destruction of the WTC on 911 is central to the Disclosure process. The true nature of this secret, revealed by the research of Dr Judy Wood, is still “taboo” in much of the alternative research/disclosure community. We will look at why this issue is so important and how other researchers have either ignored, misrepresented or mischaracterised the significance of the available evidence – and possible reasons as to why they have done this. The evidence itself has vast implications for all of us – and the way it has been handled by the

“Disclosure” movement also offers us important clues as to the agenda being followed by certain groups.

14. Secrets in the Solar System?

Since the late 1970's NASA's space probes have reached all planets in the Solar System – and Pluto is no longer classed as a planet. Mainstream Astronomy has a view of the Solar System which considers it to be “dead” and “never alive”. Since the late 1990's, our access to Image Data from Space Missions has grown considerably. Exploring some of this image data reveals a fair number of things which NASA and ESA

seem reluctant to talk about. Some people say there is life on Mars - some of them are scientists who have worked for NASA. This presentation looks at some of the NASA photos and data which suggest there may be life on Mars. In most cases, NASA will not discuss what is shown on some of these photos - discussion and analysis is left to independent researchers. Why would it be left to Ron Bennett to spot small "bug like objects" moving in the soil on Mars? Why do the BBC lie about the way the colour of the Martian sky has been determined? Why is the evidence of liquid water muddled up and covered up? Is there anything to the idea about the

Ringmakers of Saturn? In this presentation, we will explore some of the compelling evidence and try to uncover some of the secrets in the Solar System.

15. Comets, Calamities and Planet X

In this presentation we will look at the Comets, data about the alleged "Planet X" and we will review a few of the predictions about "The End of The World". To help us understand Comets and Planet X, we will look at scale of the Solar System and discuss Amateur Astronomer Observations. To understand what comets are we will look at some data from Comet Wild 2, Comet Halley, Comet Tempel 1 and data from missions to Comets by the "Stardust" and "Deep Impact" Probes.

We will look at the story of Comet Hale Bopp and the troubling way it was linked to an end-of-the-world prediction. We will look at some past impact events on earth such as The Tunguska Event of 1908, the decimation of England in 562AD by a Cometary or Asteroid Impact (which may have created the so called "Dark Ages"). We will try to sort out the truth from the hype and fear-mongering and come to some kind of sensible conclusion.

Talks and Expenses

I don't charge a fee for talks, though I do ask for travel expenses (rail or road) and accommodation expenses (if any) to be covered. I don't mind staying at someone's house to reduce accommodation costs. Also, I like to try and sell a few DVDs/booklets (they're cheap) when I do talks – so I like to set those out on a table.

Equipment

I have my own basic set of equipment including laptop, LCD projector, small speakers, small screen, small stand etc all of which I can bring with me if travelling by car, some of which I can bring if travelling by train. This is suitable for small venues of up to about 40 or 50 people as a guide.
