

WHERE DID THE TOWERS GO

?

EVIDENCE OF DIRECTED

FREE-ENERGY
TECHNOLOGY

ON 9/11

by JUDY WOOD, B.S., M.S., Ph.D.

On 11 Sept 2001, astounding events unfolded in the USA – including the complete destruction of World Trade Centre Towers 1, 2 and 7. These events changed the world – changed all our lives. Yet, it was years later that an official investigation was launched. All mainstream media sources generally take a view that those official investigations were adequate - and no one should have cause to seriously question them. However, the pictures on the left show that WTC 1 (like WTC 2) did not “burn up”, nor did it “slam down” – **it was turned into dust in mid air** – leaving almost nothing of the building itself.

Dr Judy Wood, a former Professor at Clemson University, USA, with degrees in Civil Engineering, Applied Physics and Materials Engineering Science, will present rarely seen graphic evidence which proves what really happened to those enormous structures. Her detailed scientific study exposes a challenging conclusion which most people have never had a chance to see, hear and evaluate. Dr Wood is the only person to submit elements of her forensic study in a US Federal court case in 2007, news of which was censored.

If you want to know more,
please bring as many people as you can
to this unique event - and study the evidence.

Where Did The Towers Go?

Wednesday 14th November 2012 - Doors Open 7.00 pm

**Zu Studios, 7 Phoenix Place, Phoenix Ind Est,
Lewes, East Sussex, BN7 2QJ**

See: www.zustudios.com

Admission - £5

For further information contact: Debbie on 07716993267 or email dthing@live.co.uk

Here's a small selection of the 911 Evidence that needs to be explained...

By about 1pm on 9/11, where had the towers gone?
Where is the debris? (This photo was taken at ground level.)

Why were some cars UPSIDE DOWN?

What caused the door to wilt – without damaging the rear tire?

What caused circular cut-outs in the buildings and the street?

Why was Hurricane Erin closest to NYC at 8am on 9/11? Why was it barely reported?

Do plane crashes affect the earth's magnetic field – 3500 miles away?

PTO for details of a meeting which will discuss this evidence – and more!
