

The Current Situation

- Not only are **Politicians** part of the problem, so are the **Media**. (Why haven't they told you ANY of these facts?)
- Other establishments also have trouble (or at least in the leadership) with the issue.
- Even websites like "Wikileaks" will not tell you what is included here – even though it is true.
- All the main **Political Parties** ignore the truth.
- **Amnesty International** ignores the truth.
- **"Stop the War"** ignores the truth.
- No formerly recognised group apart from the **US Green Party** have made formal statements about the **provable bogosity** of the official 9/11 story.

Larry Silverstein and WTC 7

"remember getting a call from the, uh, fire department commander, telling me that they were not sure they were gonna be able to contain the fire, and I said, 'You know we've had such terrible loss of life, maybe the smartest thing to do is, is pull it.' Uh, and they made that decision to pull and then we watched the building collapse."

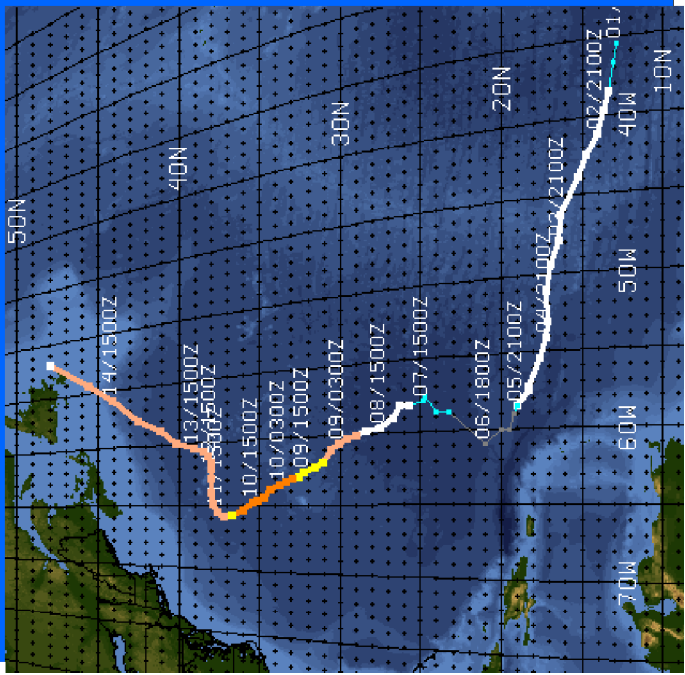

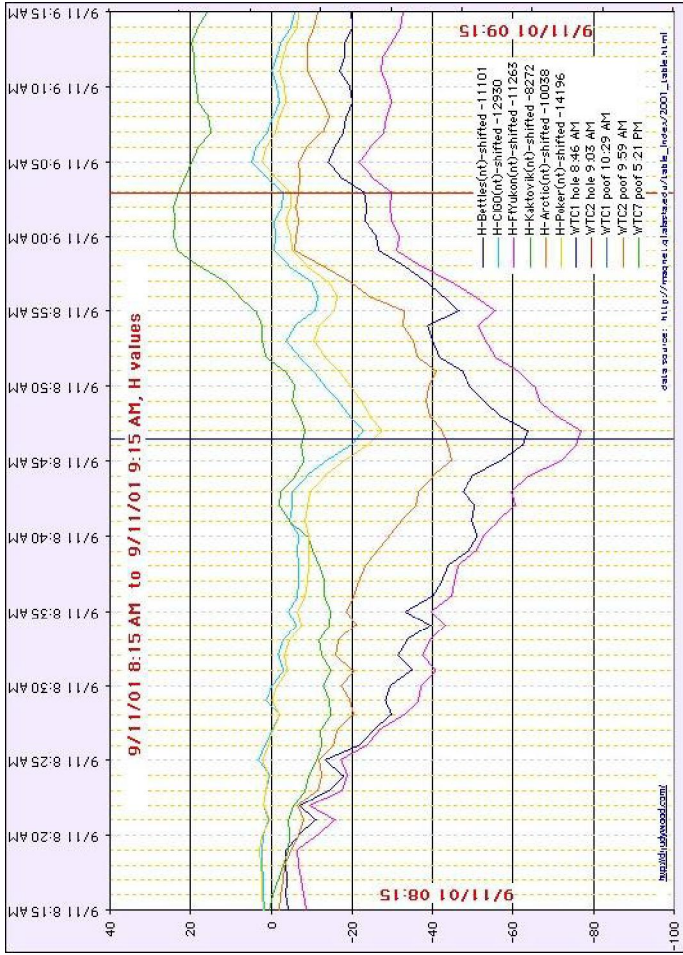

On July 24, 2001, Silverstein won the bidding for a 99-year lease - just seven weeks before it was destroyed in the September 11, 2001 attacks. The lease agreement applied to World Trade Center Buildings One, Two, Four and Five World Trade Center, and about 425,000 square feet of retail space. Silverstein put up only \$14 million of his own money. Silverstein was also given the right to rebuild the structures, should they be destroyed. (Wikipedia)

6th December 2004 United Press International - NEW YORK -- A jury (on Monday) said Larry Silverstein is entitled to \$2.2 billion in insurance. This was double the insurance coverage provided by nine insurers at the office complex. But what happened to WTC 7, was Silverstein suggesting that it was demolished with explosives? Or was something else responsible?

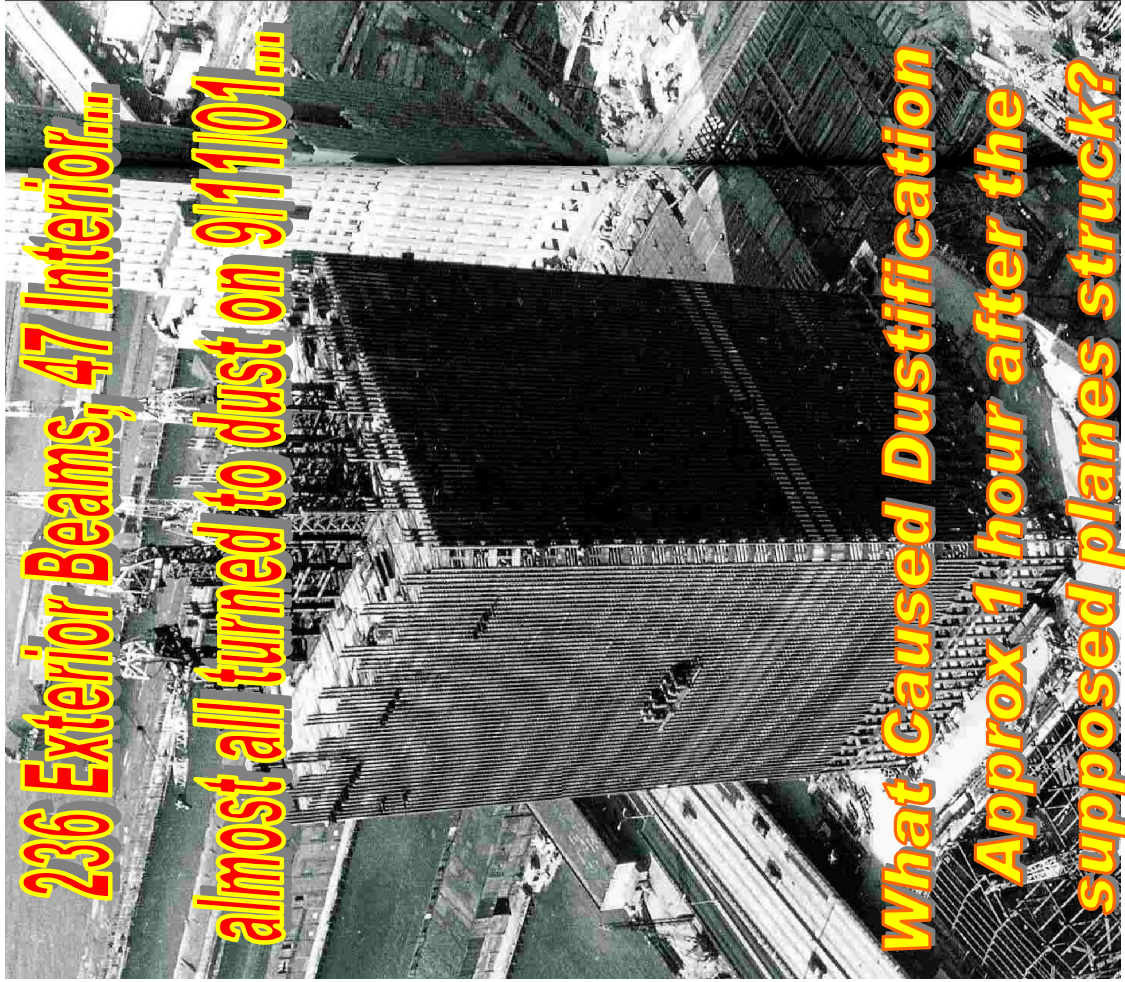

6 Magnetometers in Alaska and the First "Impact" – What Caused the Readings?

Here is the path of Erin. It went in a fairly straight line from Bermuda towards NYC, then made a right hand turn. Why? How?

Look at these massive steel beams.

**236 Exterior Beams, 47 Interior,
almost all turned to dust on 9/11/01.**

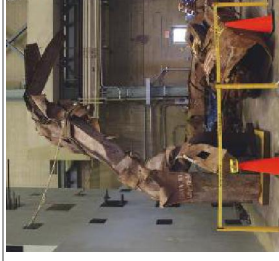

**What Caused Dustification
Approx 1 hour after the
supposed planes struck?**

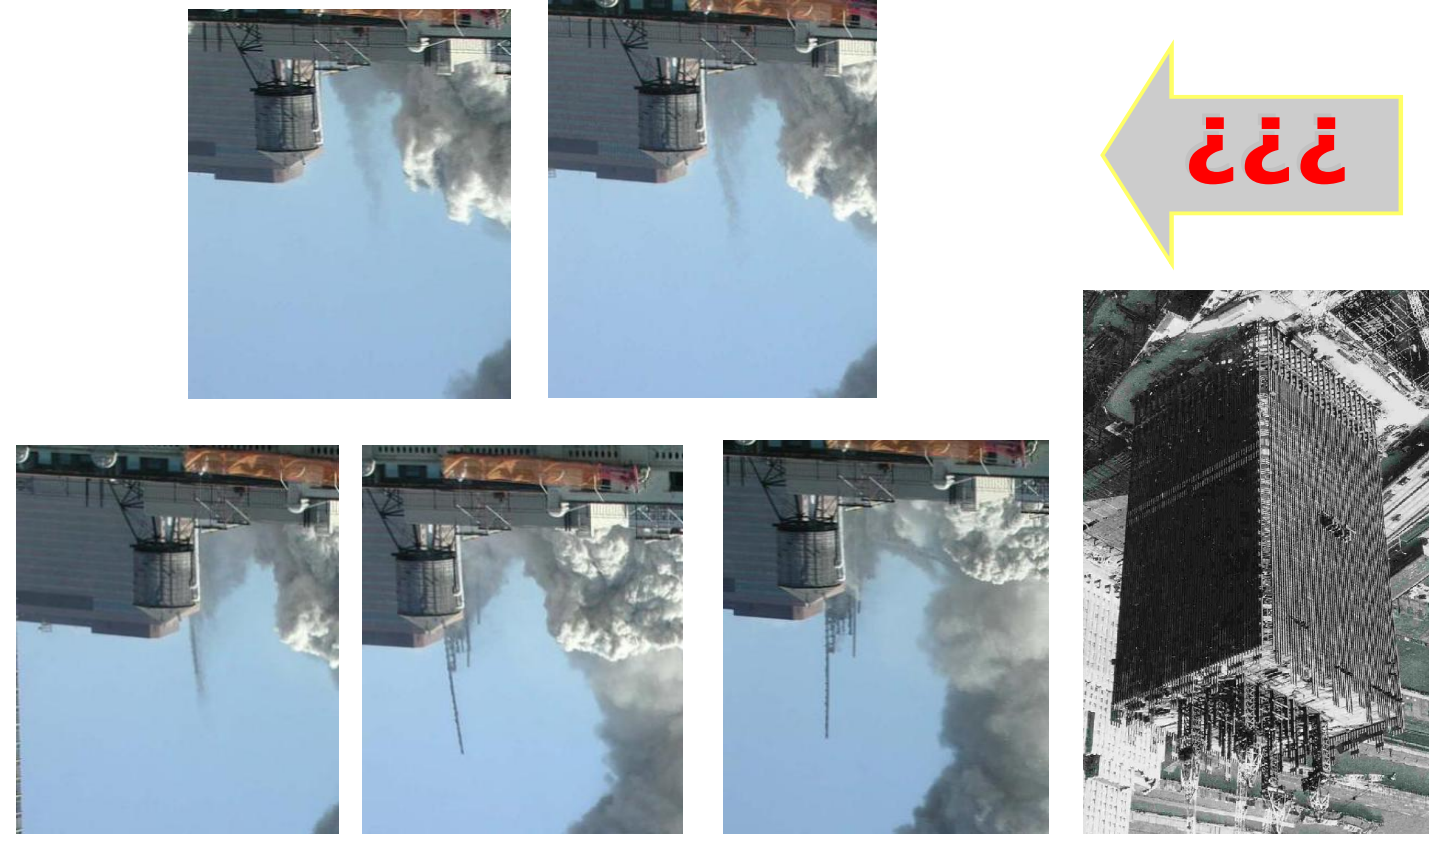

Max Temp burning Kerosene: 816 °C (1500 °F)
Steel melts at approx: 1482 °C (2700 °F)

BUT THE TOWERS TURNED TO DUST! (keep reading)

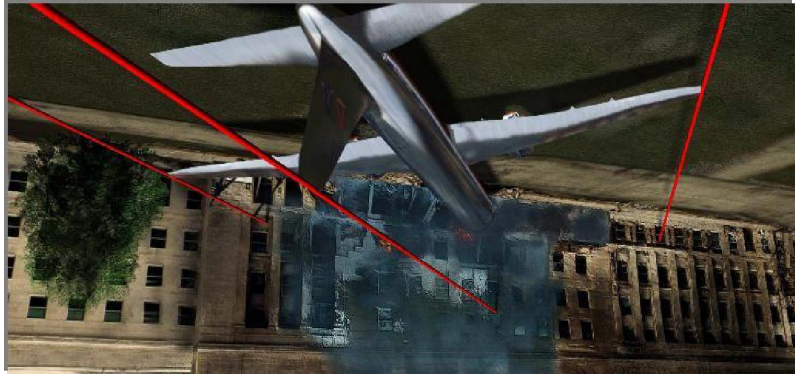

The Hutchison Effect and 9/11 Please Consider the Striking Similarities...

Phenomenon	"The Hutchison Effect"	Anomalies at the WTC
<p><u>Weird Fires</u> The fires seen near the toasted cars don't seem to ignite the paper. Some photos show firemen walking very or even through them. Are they "cold" fires?</p>		
<p><u>Bent Beams</u> Samples that John Hutchison has produced show very unusual effects on the metal – sometimes severe bending occurs</p>		
<p><u>Jellification</u> Sometimes the metal "jellifies" - other effects are also seen.</p>		
<p><u>Lift and Disintegration</u> Some WTC pictures show cars that are upside down. (How?) One of the key effects John Hutchison has reproduced many times is a "levitation" or "anti-gravity" effect.</p>		
<p><u>Other Metal & Effects</u> A number metal effects have been observed in samples from the WTC and these show similar features to some of the samples made by John Hutchison</p>		

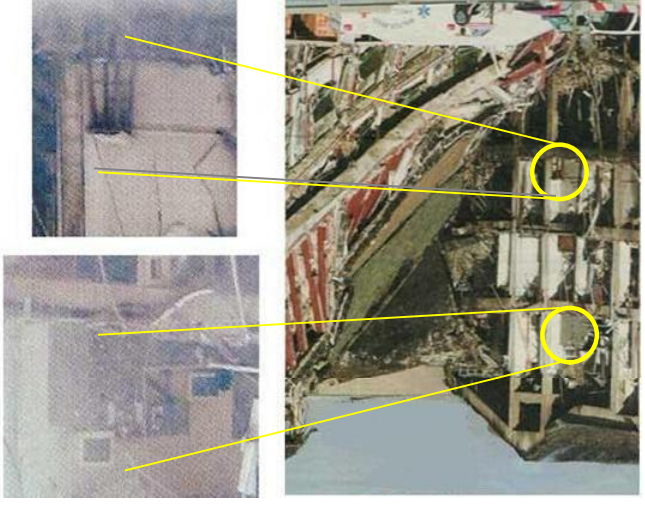

What Happened to some of the WTC Core Columns?

The Pentagon Crash

If the plane hit at a 45-degree angle, the tail should have snapped off as the fuselage flipped round!

How did the computer and book survive the fires which "vaporised" the plane?

Does this look like a "Collapse" to you?

Could Al Qaeda Have Done This?

The buildings turned into powder in about 10 seconds each!

What Caused Damage to these Vehicles near the WTC?

Why are some portions of the body badly burned, while others are shiny & fairly clean?
Why are cars UPSIDE DOWN?
