PERCEPTION MANAGEMENT OF 9/11 EVIDENCE

"MEET THE NEW BOSS"

Andrew Johnson - November 2008

It seems that 9/11 was arguably the biggest crime against humanity in modern history. It was committed in peace-time and those who planned and executed it also worked out a cover story which was good enough to fool most of the population. However, they also realised that people think in different ways, ranging from those who accept something at "face value" to those who are more analytical. Additionally, even though there are many people who are analytical, and whose job it is to review data and draw conclusions, they are sometimes prone to discarding a conclusion on the grounds that it would take them into "uncharted territory". This is perhaps because "the bigger the lie, the more the people will believe it" (a saying attributed to both Adolf Hitler and Joesef Goebbels). I would argue that this idea can be extended - few would believe that seemingly decent, honest people are actually engaged in an ongoing and often subtle effort to keep the cover up of 9/11 in place. The reason for this is that 9/11 is a "nexus point"- not just because of its political ramifications, but also its technological ones.

Having written a series of these articles, I am conscious that some people may think adding another one to the series may be "over-doing it". However, weighed against that, when there appears to be an ongoing effort to discredit serious research, or mis-direct the focus of attention from the core of this same research. Please forgive me for my attempts in trying to accurately document what I consider to be the harder-to-perceive aspects of the 9/11 and free energy cover up. As ever, in all of these matters, the reader is advised to "keep their wits about them" and watch out for mis-direction, subtle false statements or points where a mixture of true information and false information may be being mixed together – both in what is written here, and elsewhere.

Asking the Big Questions - Managing Perception

Once it is realised that advanced technology - almost unknown in the "white world" of military hardware - was used on 9/11, people will begin to ask questions such as "Who has access to this technology? Where did it come from? What it is capable of?"

One way to prevent or slow down the questioning process is to keep people in a state of confusion, doubt and/pr fear. If a person is in one of these states, it reduces the likelihood of them taking some kind of positive or effective action to change the status quo. Deliberately creating these states of doubt, fear and uncertainty could therefore be seen as a specific strategy for maintaining the cover up of 9/11 (and other crimes against humanity).

The "game" is therefore one of managing the perception of 9/11 by ordinary people. When this idea is considered in more depth, one can see, on a daily basis, how much perception management is a part of so many aspects of our lives.

9/11 The Key Evidence

In the last few months, [Dr Judy Wood has posted evidence linking 9/11 and the Hutchison Effect](#), and I have written about this in previous articles. Not long after she made this correlation, [she came across something quite startling - the presence of a Hurricane in the Atlantic](#). I have been involved in writing summaries for these Hutchison Effect and Hurricane Erin studies that Dr Wood has posted and, because of that, I have been keen to review reaction to them. One way of getting reaction was through Dr Wood's appearances on radio programmes.

[Dr Wood had appeared many times on Jim Fetzer's GCN Radio Programme "The Dynamic Duo"](#) to discuss her ongoing research, since November 2006. In considering these many appearances, it would appear that [Prof Jim Fetzer who formed Scholars for 9/11 Truth](#) supported Dr Wood's research.

On 28th Feb 2008, Dr Judy Wood and John Hutchison finally appeared together on Jim Fetzer's radio programme, to discuss this information. Analysis of this has been posted in the article [9/11 and The Hutchison Effect - Handling the Truth](#). A few days later, Fetzer sent an e-mail to Dr Wood, in which he said:

Just between us, if Judy were to back off her relations with Hutchinson, whom I consider to be a fraud, I think her standing can be salvaged."

At that point, Dr Wood more or less concluded it was not worth speaking any more with Jim Fetzer on his radio programme, despite several invites he sent. (Again, here, I ask who is Fetzer to be making such statements? Does he consider himself to be some authority on unconventional experiments?)

However, in July 2008, when Jim Fetzer suggested that Dr Wood and I do a broadcast on his radio slot, while he was apparently unavailable, we decided to take up the invite to enable us to freely explore and comment on some of the issues raised in this article. Readers, of course, will tend to think that this was a very magnanimous gesture by Fetzer, though I would argue, based on evidence gathered later, that the main reason he did this was to try and maintain a "perceived connection" or even a "perceived ownership" of Dr Wood's research, even though he had already threatened her reputation. This connection allows him to publicly state he is "a supporter" of the research, whilst privately, he seems to act in certain ways which contradict this position.

Presenting the Evidence - Dynamic Duo 30th and 31st July 2008

[In the first broadcast by Dr. Wood and myself](#), though we did want to clarify why Dr. Wood had not chosen go on air with Jim Fetzer since he had implied in e-mail that "Hutchison was most likely a fraud", in part because of Ace Baker's video fakery exercise,. Then, [as covered in a previous article](#), he did not question specific points of evidence in relation to the

Hutchison effect - he merely agreed that Ace Baker appeared to have reproduced videos which look similar (but not the same) as some of those of John Hutchison.

When I spoke with Dr Wood on GCN's "Dynamic Duo" show, she said of her own research

"It's so easily distorted and it seems that various folks try to take ownership of my research to distort it – the meaning of it – and where it's going. You know, on various forums they refer to 'Fetzer and Wood's research' and I don't know how Fetzer has anything to do with my research."

Further, Dr Wood commented that there were instances where

"Fetzer has been invited to present my work but then it's not presented quite right - he refers to lasers masers and plasmoids."

Fetzer responded to this on the 31st, during the first segment in which he read out a statement including the following:

I completely reject the idea that I am taking credit for her work or "not getting it right".

(The statement Fetzer read out was [sent to us earlier in an e-mail](#)).

Dr Wood did not suggest Fetzer was taking credit for her work – she said that it seemed like he was trying to “take ownership” of it. Also, to introduce lasers, masers or plasmoids is completely unnecessary - as there is no clear evidence which Dr. Wood has catalogued which directly implicates them. Further, her newer research makes an extremely robust case that Hutchison Effect-like technology was involved – and [Fetzer already knew of this](#), but did not mention it in his statement.

Further, he said:

After having spent so much of my time and reputation in the defense of Judy's work, it is more than disappointing to have her make these malicious attacks on me--especially after going out of my way to have Andrew interview her to make sure her latest work was reported.

No malicious attacks were made on Fetzer – Dr Wood merely stated she was not happy with the way he had interpreted certain things, introduced redundant and or confusing terminology and included these in presentations he had made.

Fetzer then pointed how frequently Dr Wood had been on the Dynamic Duo, and of course, it is true that she was the most regular guest of all. One of the reasons that she appeared so frequently was because she is the person who had *done the most original research*. Also, by letting Fetzer discuss it, one side effect is that he *appears* to support it – and, indeed, this seemed to be true, right up to the point where she posted her Hutchison Effect Study, which soon resulted in her standing being threatened by Fetzer.

Was Fetzer's Threat Later Carried Out?

[Fetzer's e-mail of 03 Mar 2008](#) referred to Dr Wood's reputation "being salvaged". It was therefore interesting to listen to certain things that Fetzer said on a later broadcast on his GCN programme - on [October 16th 2008, where his guests were Ace Baker and CB Brooklyn.](#) (Please listen to this whole broadcast to hear the full context of points I list below.)

Fetzer discussed a previous booking with Ace Baker and Dr. Wood and that he had invited Ace Baker on before Dr. Wood - despite Dr. Wood having done the research on the Hutchison Effect's relationship to 9/11. [Fetzer said:](#)

I had wound up booking Ace on Wednesday and Judy on Thursday but I'd also offered Judy on Wednesday and Judy discovered that Ace was going to say something about Hutchison's work – she wanted to come on with Hutchison – which I thought was great – so when I discovered that there was this concern about Ace coming on first, I invited her to come on Wednesday... and I could move Ace to Thursday. She declined to do that. She told me she couldn't make that change. Frankly, I don't believe that's true – I think she could've made the change.

So, Jim Fetzer is essentially accusing Dr Wood of lying over this issue? Why? What evidence did he present that made him believe Dr. Wood's statement was "not true"?

Fetzer Blames Dr. Wood

[Later in this same broadcast, Fetzer then repeats invitations to come on his programme:](#)

He suggests that Dr Wood and John Hutchison go on his programme and discuss the evidence. [This already took place, however, on 28th Feb 2008](#) – and has been discussed elsewhere. So why does Fetzer want to repeat this exercise? Does Fetzer think that blaming Dr Wood for not contacting him, when he has threatened her reputation, and then suggested she is lying is conducive to having an open discussion with her on air?

Fetzer then says, of Hurricane Erin that it "fascinates him" but...

I've been very reluctant to say anything about it – particularly since she has attacked me for stealing her research – when all I was doing was saying "Judy has made this observation" and offering my interpretation of what it is supposed to mean. If I'm wrong about that, then it's the best I've been able to do, given the limited resources I have to work with because I'm no expert in these areas.

This is very peculiar, as Fetzer has previously been quite comfortable in repeatedly quoting PhD Physicist John P Costella in relation to his opinion of the Hutchison Effect. In any case, Fetzer has heard explanations of the suggested role of Hurricane Erin in 9/11 – it was made on 2 the broadcasts we did on his programme – and he called in to comment about the broadcast – so he must have heard some of it! If he didn't hear all of it ([a free podcast is available](#) as well as "on demand" playback), then why wasn't he apparently interested in this important new study?

Fetzer then repeats how Dr Wood has attacked him – and Ace Baker, which is not, true. Rather, Dr Wood has pointed out, as I have, how Ace Baker put out false information – stating he had reproduced the Hutchison Effect, when in actuality he hadn't – instead, he had made a fake video. This is *not* an attack – it is pointing out what Ace actually himself admitted doing! Similarly, Dr. Wood had pointed out that Jim Fetzer had repeatedly used inappropriate terms to describe what she had said – i.e. the use of Lasers, Masers and Plasmoids – and that Fetzer seemed to be "steering" the discussion of Dr Woods research – rather than "stealing it". Note she did not say Fetzer had "stolen" it – this seems to be another instance of Fetzer using subtle changes in language to misrepresent what was said and what actually happened. That is, the word "stolen" is a very emotive term, whereas "trying to take ownership" is rather different – and more appropriate to what seems to have taken place.

Fetzer then says:

These are problems with Judy and her failure – her unwillingness to communicate with me places the onus of responsibility on her shoulders, not on ours.

So, again we see Fetzer deliberately painting Dr Wood in a bad light – is he carrying out his threat? Is he making her reputation "unsalvageable"? To me, this is exactly what he is doing, but he uses some careful spin and subtle misrepresentation of what has actually been said and done. The result is that the main focus is shifted *away from the study of 9/11 evidence and onto a character analysis of Dr Wood*.

I would say to Jim Fetzer: "What about the presence of the Hurricane on 9/11, Jim? What about its path? What about the magnetometer data, Jim? What about the upside down cars, Jim? What about all the other correspondence of Hutchison Effect evidence and WTC Evidence? If Dr Wood did come on your programme, would you be as silent as you were on 28th Feb 2008 on this evidence?"

Ace Baker Hates Dr. Judy Wood

In the broadcast Fetzer brings up the issue of Ace Baker's hate mail and says:

...you literally used the word hate [laughs], so I guess there's one definition by which that would fall under that heading...

Also in this extraordinary broadcast, Ace Baker states of Dr Wood that of :

She's working real hard to destroy the case for molten metal... and err... hand in hand with Steven Jones – I think that was really their assignment – the two of 'em together – I would point out that Judy and Morgan were extremely viscous in their attacks on Steven Jones – and rightly so.

This is very peculiar – Ace presents no evidence to back up these very serious allegations – neither does he state whether he thinks there was indeed Molten Metal or whether there wasn't. He thinks attacks are justified and he has now gone on record to state that he hates both Steven Jones and Dr Judy Wood. So, what about his ideas about what actually caused the destruction of the WTC? Is he going to take any time to talk about these?

Ace then says:

Yeah - you know what? I do hate her. If you can't hate conspirators to mass-murder, who can you hate?

Baker presents no evidence for this extremely provocative statement – couched in a most unpleasant manner and being aired on the Web radio station. So how does Jim Fetzer react? Does he say “Well Ace, are you sure that’s not going a bit too far? Are you sure about this?” (When considering these questions, take into account that Fetzer counts himself as a supporter of Ace and a dedicated supporter of Dr Wood.) Fetzer simply laughs out loud, then says he does not agree with Ace’s views, but Ace has a right to hold them.

Some people don’t see that there might be “some problems” with this sort of discussion on this programme. However, please consider the following - how would people react if Dr Wood went on to Jim Fetzer’s programme and said “I hate Steven Jones” or “I hate Ace Baker”?

By considering these sorts of ideas and looking carefully at the language and mannerisms employed in this broadcast, I hope the reader can begin to see how “Perception Management” works. I would suggest that whole perceptions of issues can be changed with a tone of voice, a laugh, a chuckle etc – and the listener’s or readers psyche is distracted from the double-standards and “covert smearing” which are in operation.

Fetzer on Hutchison and Baker

In the same broadcast Fetzer stated

It's very difficult for me to imagine how anyone could just happen on these phenomena – that they would tend to require a high-level background and training – maybe no necessarily a PhD in Electromagnetism, but maybe something that was roughly equivalent...

John Hutchison did not just “happen on the phenomena” – it took him several years to generate effects that were repeatable – and he assembled more than 2 tons of equipment! What exactly is a “PhD in Electromagnetism”? What would be an acceptable equivalent? Does scientific discovery necessarily follow on from obtaining a science certificate?

...and he was very evasive – he didn't really want to answer my questions

This is not really true – John answered the questions as best he was able, but Fetzer wanted to ask John about his *entire* background – dating back before the 1980’s! This was not the same sort of level to which he interrogated Ace Baker. Fetzer stated that the reason he did not do this was because he had met him and had a very high opinion of his work (but this was even after it had been proved that Ace Baker had (a) stated he had reproduced the Hutchison Effect when actually he hadn’t and (b) stated that Andrew Johnson had sent him hate correspondence when he hadn’t. Additionally, Ace Baker had sent Dr Wood hate mail and Fetzer had no real problem with this.

Muddling the Evidence

As if confirming the above concerns about use of redundant or confusing terminology, Fetzer himself, in a later [broadcast on the Dynamic Duo on 05 Aug 2008](#), said

"Now there's another group, championed by Judy Wood, who has been promoting the research that suggests it was some kind of directed energy weapon. Now Judy is so tentative about how it was actually done – that's about as far as she goes in describing it. I for specificity add that it could have been lasers, masers maybe plasmoids – something very sophisticated was going on here."

Again, Fetzer failed to mention the Hutchison Effect related evidence and research that Dr Wood had posted. In the same broadcast, he then went on to say:

"Judy is now suggesting the source of energy - this is my interpretation of her - what she is talking about - there was a hurricane off the coast of New York that was never reported to the American People on 9/11. This is bizarre. A hurricane could theoretically be used as a source of energy that might have been expended in the demolition of the twin towers if you could figure out how to transform it in a constructive, directed fashion".

On the surface, this might sound correct, but sadly it isn't - Dr Wood did not say the Hurricane was a "source of energy" nor that "the energy was transformed". Dr Wood's study is about *field effects* which is a different idea - and it ties in exactly with John Hutchison *field effect* experiments. Indeed, Dr Wood entitled the new study "*9/11 Weather Anomalies and Field Effects*". Fetzer omits these ideas and clearly stated connections. So, I would therefore point out that Fetzer who, on the one hand claims he is "clever" because he has a 35-year academic career to prove this, on the other hand claims he is not clever enough to correctly pick out and focus on details like those I just highlighted here. In other words, he is muddling the evidence. I conclude, therefore, he is therefore helping to generate engineered ignorance.

In his Aug 05 2008 broadcast, he had plenty of opportunity to comment on any of the data or topics we covered in our broadcast - but instead chose to talk about infighting in the 9/11 truth community then he talked about Barrack Obama for a bit - all over the map... (Also, he didn't even mention the name of the Hurricane.) Just after the segment referenced above, he gives Dr Wood some more "positive strokes", then says "go and buy the Madison DVD" (which, if you haven't seen it, is quite a confusing mixture of 14 hours of material).

Fetzer Discusses 9/11 on the 7th Anniversary

[On the 7th Anniversary, Jim Fetzer appeared on Richard Syrett CFRB](#) (Toronto) talk show to discuss 9/11 research developments. Richard Syrett's (RS) first question to Fetzer was:

RS: Here we are 7 years on – any new information that has ... say... come down the pipe in the last ...um... 6 months, a year...

JF: Well, I think there's quite a bit including that David Ray Griffin continues to publish new books – he has one called 9/11 contradictions...

Fetzer pointed out that the WTC molten metal stories are implausible and later *did* indeed mention Dr Wood's research in the broadcast, when he said:

I follow the work of Judy Wood here [website and qualifications listed] and who has offered the hypothesis that it was some kind of directed energy weapon. It turns out there are whole families of these and they're now beginning to admit that they have these weapons and they're using them in Iraq...

Fetzer then points out that the military industrial complex is therefore implicated in 9/11 (and this would seem to be true) and the conversation continues:

RS: What are we talking about? Like an electromagnetic pulse? Are we talking about Scalar Technology...?

JF: Well, there are a variety of possibilities, will I wish – ye know – if I were enough of a physicist, I'll tell you, when we gave the conference on the science and politics of 9/11, when it was all done, I invited members of the audience to come up and say a few words and an elderly lady came up and explained she had a PhD in Physics, and she didn't know why she hadn't seen it before, but after watching Judy Wood's presentation, she realised that they had to have used masers. So something like lasers, masers, plasmoids – something going on here – very, very sophisticated...

So, Fetzer, even though he follows Dr Wood's research (even though he repeatedly refers to her on this and other broadcasts as Judy Wood), prefers to quote someone anonymous (to us) person's opinion – and chooses *not* to mention:

- a) The Hutchison Effect (and it is worth mentioning here John Hutchison has guested on Syrett's show on more than [one occasion](#)).
- b) Chooses not to mention Hurricane Erin, and the most recent research, featured on his own programme some days earlier (and in one segment he called in himself).
- c) Instead, he reports the opinion of an anonymous PhD physicist – given over 12 months ago, who stated she thought it that “masers were involved” and Fetzer discusses *nothing* else at this point.

Can anyone see anything wrong with this picture? Fetzer is giving his opinion, someone else's and omitting to discuss *any* of the important evidence already put on the table by Dr Wood.

More Perception Management

One of the key things that can be confusing in the discussion of what was said is the idea of "taking the credit" - whether Fetzer said this or not, I am not sure, but it's all about perception. (The same is true of the official story of 9/11). Fetzer is trying to create the perception that Dr Wood is complaining about Fetzer taking credit for her work. If you listen to Dr Wood carefully, she hasn't said this - she said that Fetzer is confusing and misquoting her research - which is true - Fetzer has previously and repeatedly mentioned "lasers, masers and plasmoids" when discussing the evidence on his show - these are not terms that Dr Wood has used herself. It is therefore easier for listeners to be confused and think that "lasers,

"masers and plasmoids" is what Dr Wood said - and it isn't what she said. If a PhD physicist said "Thermite brought down the towers", should we assume he is correct?

Fetzer has created the perception that he is acting as a "host" and main supporter for Dr Wood's research and therefore he can justifiably claim to be some kind of "spokesperson" for her - even though he would likely never claim he is such a spokesperson. This is all very subtle psychology and difficult to see if you don't look hard. Knowing more details helps - such as the fact that Fetzer has not offered any financial support for Dr Wood's research (I could go into more details here, but I don't think it is appropriate at this time).

Later, he complemented me on the article I wrote about Ace Baker and the Hutchison effect and he invited me onto his programme to discuss the Hutchison effect. I refused - citing the above message as one reason. He didn't apologise - he called me a child again (this is discussed in "Ace in the Hole Part III"). He then wrote to Dr Reynolds and Jerry Leaphart and tried to persuade them to go on instead (they both refused).

A Magnanimous Act

By the "generous act" of letting me host with Dr. Wood on GCN, Fetzer can be perceived as perhaps being magnanimous and therefore Dr. Wood and I "look bad" or ungrateful for criticising him or not thanking him. (The GCN audience is small, so it doesn't matter a great deal if information gets out. With someone like Ambrose Lane on the Power XM Channel, he had a much, much larger audience - which was, I would say, why Dr Wood and myself never got onto the air.) I would suggest that this is a very subtle manipulation psychology. As another example, he complemented me on my hosting (which I think was arguably better on the second show than on the first) - why did he complement me then, when he had:

- (a) previously called me a child and
- (b) said in an e-mail:

I am sorry, Andrew, but your standards of credibility and mine simply do not coincide. I suppose that having a Ph.D. in the history and the philosophy of science and having devoted my professional life to logic, critical thinking, and scientific reasoning have given me a different perspective than your own.

To me, this "flip flop" behaviour doesn't make any sense. I have never been rude to Jim Fetzer, nor have I insulted him. I have, of course, been very critical of him and I think I have shown strong evidence that he is following some kind of agenda (there are those who disagree) – and I certainly don't have proof that he is, indeed, following an agenda.

Look into my Eyes! Look into my Eyes! (Not around the eyes...)

I recently described Fetzer's MO ("mode of operation" or "modus operandi") thus. (It may sound a bit harsh, but I think this is accurate.)

- 1) He gets puffed up with academic credentials (but ignores these when it suits him - we do not know if Ace Baker has a science degree, for example).
- 2) He is very articulate, a good orator ([listen to the Syrett broadcast](#) to see how rapidly, fluently and succinctly he can deliver information). He is clearly a competent writer.

- 3) He takes an issue like 9/11 - pretends to analyse it or "consult" about it, then basically can't draw any firm conclusions about anything (this is quite similar to what Kevin Barrett and David Ray Griffin also seem to do).
- 4) He mixes things round and muddles things up.
- 5) He stokes the fighting from time to time (e.g. calling me a child, saying "shame on you" to Dr. Wood).

These actions can prevent people from seeing the real truth - the real evidence - because they are so distracted by his false authority. i.e. "I am clever, but I can't make a decision about what happened on 9/11 - so neither can you."

When this mask starts to slip, he does one of:

- 1) Plays the victim
- 2) Calls people stupid or picks a fight
- 3) Ignores the issue and distracts/diverts onto something else.

It's very effective when done well - and is entirely compatible with "freedom of speech and expression" – but people then don't know who's telling the truth...

So in summary, I would suggest that what Fetzer is doing is very subtle. You can't see it unless you look carefully. He also "turns nice" after being nasty.

Drs. Wood and Reynolds have attempted to prosecute NIST's contractors for wilful blindness. It now seems to me that, having looked at the evidence, that Fetzer is also being "wilfully blind" – over Hutchison Effect evidence and Hurricane Erin-related Evidence.

Why this is all important

Some might suggest that the information and commentary I have posted here is trivial or irrelevant – or "damaging" in some way. However, I would try to remind the reader of what is at stake. Thanks to Dr Wood's diligent study, I put it to the reader that we have conclusive evidence that advanced "free energy" and weather modification technology was used in the horrendous black operation that was 9/11. I put it to you that we have conclusive evidence that the cover up of this truth is being carefully managed, by people that you may seem reluctant to scrutinise, because they appear to be "white hats". The 9/11 truth movement is being controlled and directed. Perhaps we should remember the words of "Won't Get Fooled Again" – "The men that spurred us on sit in judgement of our wrong" and "Meet the new boss.... same as the old boss".

Judy, Morgan, Jerry,

Listening to Judy and Andrew tonight was rather painful. Judy made several misleading statements. Obviously, if her research is being described as "Fetzer/Wood" it is because I have been her champion since November 2006, when we had (what I believe to have been) the first of our interviews. It was during this discussion that she suggested the source of energy could have been in space. She was already using the phrase "beam weapon" on her web site, which I knew was going to generate problems of the "space beam" and "death ray" kind, but she told me she thought it was appropriate and kept the phrase.

In addition, I have never been invited to present her research, so I have no idea where she got that. I do of course discuss her work, since I could not make a competent presentation on the World Trade Center without doing so. But my presentations are of my views on these matters, including differentiating between conventional methods (dynamite, thermite/thermite, etc.) and unconventional (mini-nukes, lasers, masers, plasmoids, etc.). I even have a slide that shows all of the possibilities. There is no intimation that Judy has endorsed one or another of these possibilities but only that her work tends to disprove that conventional methods were enough to bring about the devastation. I mention them to lend some specificity to the discussion.

At the very end of our conference, a participant with a Ph.D. in theoretical physics reported that, after hearing Judy's presentation, she was convinced that masers were involved. I am unable to discriminate between the alternatives but only indicate that the mechanism seems to lie in this direction, which Judy and others continue to investigate. I completely reject the idea that I am taking credit for her work or "not getting it right". I will create an opportunity to set the record straight on these points. After having spent so much of my time and reputation in the defense of Judy's work, it is more than disappointing to have her make these malicious attacks on me--especially after going out of my way to have Andrew interview her to make sure her latest work was reported.

We have a practical problem regarding the book. I spent a lot of time and money setting up the conference and all that. It was with the understanding that we were doing a conference together, that a DVD would be produced from it, and that we would jointly produce a book. I need to know that each of you intends to contribute your chapter, as we have all understood would be the case. I do not expect to be stiffed by Judy for reasons that have scant or no basis in reality. If she has some other grudge of which I am unaware, she should share it. She has been uncommunicative with me for some time now, which I view as highly unprofessional. I need to know from all three of you that you are going to fulfill your commitments to this project and enable me to complete this new book.

Jim

P.S. You can easily confirm my depiction of my talks by reviewing one or more of them on YouTube. I would be glad to send copies of my PowerPoint slides, too, including the one that outlines the full range of alternative possible explanations. I discuss Judy's work but I do not misrepresent it and I certainly do not take any credit for it. If anyone else has done more to make her work a household word, I would like to know. I am not happy about this, but I can manage to deal with it as long as it does not interfere with the book.

9/11, DIRECTED ENERGY WEAPONS AND HAARP **"...WITHOUT REFERRING TO DR. JUDY WOOD"**

The Ongoing Perception Management of 9/11 Evidence and Research

[Andrew Johnson](#)

Dec 31st 2008

Alfred Webre at Madison, Wisconsin Conference

“Science and Politics of 9/11 – What’s Controversial and What’s Not” Aug 4/5 2007

Link: <http://uk.youtube.com/watch?v=MqJEvqrxFYM>

The depopulation matrix is designed to be activated by a 9-11 style false-flag state terror attack against a major urban centre in the US. Possibly using nuclear, biological weapons or advanced exotic weapons such as directed energy weapons – which I think Dr. Wood has done a magnificent job of... really holding her space and... [applause] ... bringing us to this.

Alfred Webre (AW) speaking with Leuren Moret (LM) on Sofia Smallstorm's "Expansion" RBN Internet Radio Broadcast, 14 Nov 2008

AW	<i>...just run through [in] 5 minutes why you think HAARP was the instrument that caused the molecular dissociation and the controlled ... disappearance of the World Trade Centre.</i>
LM	<i>Well, it was really Judy Wood's presentation which had the physical evidence and the photos which are not available – they haven't been ...</i>
AW	<i>Without... without referring to Judy Wood – in your own words – why do you think HAARP caused it?</i>

In the last few months, I have written about how I think that key figures in what might be called the 9/11 Official Truth movement seem to be involved in a mixture of “cover up” and “muddle up” regarding the discussion of and general conclusions about the most important 9/11-related evidence of all – the Hutchison Effect evidence and that related to Hurricane Erin. [One other author has also written about some general problems with the 9/11 Official Truth Movement.](#) In the table below, I have linked my own z articles and included summaries of the questions they focus on:

In writing these articles, I will frequently mention the concept of “Free Energy” – which means being able to extract useful energy from the environment, or from within materials themselves – without “burning” in either a chemical or nuclear sense. Nikola Tesla called it “radian energy” (as he proposed it was present everywhere – as sunlight is on a clear day). Others call it “vacuum energy” or “zero point energy” or even, perhaps, “orgone energy”. Mainstream science usually states that “zero point energy” cannot be “extracted” and made to do useful work because that would violate certain laws of physics. [Experimental evidence](#) does call this conclusion into question, however.

Having written these articles, I conclude some of the people involved seem to have had 3 main objectives:

- 1) To try to tarnish or discredit the reputation of Dr. Judy Wood, as a means of drawing attention away from the evidence she has discussed in her comprehensive pictorial studies posted at <http://www.djudywood.com/>
- 2) To prevent people from making the connection between 9/11 and Free Energy technology and the use of weather control technology on that same day.
- 3) To play down or ignore [Dr. Wood's Qui Tam case against NIST's contractors](#), some of whom (SAIC, ARA and Boeing) just happen to be involved in directed energy weapons research, assembly or manufacture.

For example, on the 7th Anniversary of 9/11, Jim Fetzer appeared on the Richard Syrett CFRB (Toronto) talk radio show to discuss 9/11 research developments.

Fetzer mentioned none of the profound studies mentioned above, preferring instead to mention a new book by David Ray Griffin.

However, despite efforts to obfuscate, discredit and muddle up discussion of 9/11, Hurricane Erin and the Hutchison Effect, more people are still becoming aware that this information is “out there”, not least because of Dr. Wood’s appearance on several regular and reasonably well known non-internet radio programmes such as those of [Rollye James](#) and [Richard Syrett](#). It is worth noting that Dr. Wood appeared on the Richard Syrett Show one week after Jim Fetzer – and at that time, Richard Syrett seemed particularly surprised to learn from Dr. Wood of the proximity of Hurricane Erin to NYC on 9/11.

The New Chapter

So, let us now turn to what seems to be a “new chapter” in this “ongoing saga” of the marginalisation of what, it can be strongly argued, is the most important and comprehensive 9/11 research that has been made public. The latest tactic seems to be to blame HAARP for the destruction of the World Trade Centre Complex and simply pretend that Dr. Judy Wood – and half of the research she has completed - does not exist. As you will see from the media linked above, this tactic seems to have “come into play” sometime between August 2007 and November 2008, although further evidence narrows this period to between April and November 2008.

At this point, it should be noted that in [the Press Release I posted to introduce Dr. Wood's Hurricane Erin Study](#) and her associated presentations, I specifically stated:

A later part of the study examines some of the data relating to patterns of earthquakes in 2008 and possibly associated unusual weather patterns, which may be related to secret or partially disclosed environmental modification technology (such as HAARP). However, the study does not establish any clear links between HAARP and the events in New York on 9/11.

The Players

The two “main players” in this new chapter are [Alfred Webre](#) an International Lawyer, peace and environmental activist, prominent in the naissant field of Exopolitics, and [Leuren Moret](#) - a Geoscientist who has travelled the world to discuss and expose the dangers of radioactive contamination caused by the use of Depleted Uranium in modern artillery shells. With this starting point, it seems hard to imagine how two such people would play a role in actively covering up the links between 9/11, Free Energy technology and Weather Control.

Exopolitics and Depleted Uranium

I first came across Alfred Webre in 2004 or 2005 when I found out about his involvement in the controversial field of Exopolitics. He wrote about this in his book *Exopolitics: Politics, Government, and Law in the Universe*. A number of people shun him for his involvement in the field of Exopolitics, but my own views on this subject area may be substantially different to those of some people reading this article, so I leave you to explore other sections of <http://www.checktheevidence.com/> to find some reasons why I say this.

I became aware of Leuren Moret’s work as a result of seeing [a film called “Beyond Treason”](#), and later I heard her speak as [a guest on Jim Fetzer’s Dynamic Duo programme in June 2007](#).

I had also communicated with Alfred Webre some time in 2007 following my cursory involvement [with the case of UK Hacker Gary McKinnon](#). Here, I was glad to learn that Alfred Webre seemed to be trying to help with Gary’s case, by getting several people in the exopolitics community to make a joint statement in support of Gary.

How could these 2 people possibly become negatively involved in the matter of Dr. Judy Wood’s 9/11 research, in the manner which is described here? As I write this, I am again feeling very uncomfortable with what the evidence has shown me.

Madison Conference, Aug 4th – 5th, 2007

Both Alfred Webre and Leuren Moret attended Dr. Judy Wood’s presentation at the Madison Conference, Aug 4th – 5th, 2007, which was organised by Kevin Barrett and Jim Fetzer. At the conference, also, [Leuren Moret gave a presentation about Depleted Uranium](#) and [Alfred Webre gave a presentation about false flag operations and the setting up of an international war crimes tribunal](#).

As already shown above, Leuren Moret agreed, because of the physical evidence shown in Dr. Judy Wood’s Madison presentation, that something very unusual happened at the World Trade Centre. It is worth re-iterating that, at the time of the Madison Conference, Dr. Wood had only stated that some kind of Directed Energy Weapon had been used to destroy most of the WTC complex – she had not yet [made the connection, through a study of the evidence, to](#)

either the Hutchison Effect nor had she considered the role of field effects associated with Hurricane Erin, which was present over the Atlantic ocean, closest to NYC on 9/11/01.

During his Madison presentation, Alfred Webre discusses the problems we, as people, currently have and possible ways we can solve them. In relation to environmental problems, he said:

3. Shift to new breakthrough energy technologies - moving beyond petroleum and nuclear which are the principal tools of the war crimes organisation - to breakthrough fuel-less non-polluting zero point energy technologies that are now sequestered in the National Security State.

We shall see the relevance of his statement later in the article.

From Exposure to Cover-up, From Clarity to “Muddle-up”

I opened this article with two media clips, the second being recorded approximately 15 months after the first. Why did Alfred Webre “champion” the name of Dr. Judy Wood in August 2007, then instruct that it not to be mentioned in November 2008? What had changed in that intervening period? My conclusion is that it is to do with the association of Free Energy technology and the events of 9/11.

14th Feb 2008 / April 2008

On 14th Feb 2008, Alfred Webre, at his own home, interviewed Dr. Judy Wood and John Hutchison to discuss the relationship between their respective research. The interview included a discussion of specific physical evidence relating to 9/11 – it was over 1 hour long, although Dr. Wood and John Hutchison spent a little longer speaking with Alfred Webre.

Links to the audios of the interviews were not, however, posted until Monday April 21, 2008 on Alfred Webre’s Exopolitics blog.

In the interview, Alfred Webre introduces Dr. Wood and John Hutchison as “two very distinguished guests” and then reads out basic biographical information. He said that they “will discuss that photographic and video evidence suggests that the world trade centre towers were destroyed using directed energy weapons.” He then reads segments from the Press Release about Dr. Wood’s Hutchison Effect/911 study, which I posted on 30th Jan 2008. Webre reads these statements

“In early January 2008, Dr. Judy Wood posted a new study on her website (www.drjudywood.com), which relates effects seen in photographs taken before, during and after the destruction of the WTC tower[s]”

However, Webre omits, at that point the words, “to effects seen in John Hutchison’s ongoing experiments,” as it clearly states in the press release.

He repeats that he had the pleasure of attending Dr. Judy Wood’s Madison presentation in August 2007 and he described it as “like attending a college seminar because [Dr. Wood is] indeed a university professor”.

During the interview, Alfred Webre was told of the connection between Hutchison Effect evidence and the effects seen at and near the World Trade Centre on 9/11. Webre even acknowledges that the Weaponised Free Energy Technology should be disclosed and used for Peaceful Purposes, thus:

At the 33:30 mark, Dr. Wood says:

"I don't know if it's the exact same thing as the Hutchison Effect, but what I've learned from this is that... here is something that does the same thing that we see..."

Alfred Webre says "yes" and Dr. Wood continues, "...so we know it's possible." Webre says "right".

At around 44:25 in the long recording linked above, Dr. Wood suggests "an amazing technology was used [on 9/11]" and Webre says "yes". Webre also appears to agree when Dr. Wood suggests that the technology could be used for good things – he states that her suggestion is a "very profound statement". Webre then suggests (around 45:30) that behind the black budget projects there are these

"advanced technologies which have been developed, at taxpayer expense, for weapons applications, which could as easily be applied to new energy applications that would be to the benefit of the biosphere."

He says "whatever technology did this should be disclosed". John Hutchison also expresses his wish for the technology to be disclosed and that his method of "doing this" is to appear in TV documentaries about the subject and talk about his work and experiments.

Further, Webre suggested that Wood and Hutchison submit a paper to the IEEE (Institute of Electrical and Electronics Engineers) about their findings.

This whole interview is analysed in more detail in an appendix to this article.

It is worth noting, at this point, that on Monday 10th March 2008, [Alfred Webre had Richard Gage of Architects and Engineers for 9/11 Truth as a guest on his Co-Op radio broadcast](#). The Richard Gage interview is mentioned, because [some severe problems with the type of evidence he has been involved in promoting can easily be discovered](#).

Strangely, though the Wood/Hutchison interview was recorded in Feb 2008, it was not broadcast until April 2008 – on [the day before a TV interview with Richard Gage was broadcast in the Vancouver Area](#).

14th November 2008 – "Expansion" on RBN with Sofia Smallstorm

The next development in this story took place a few months later when, [on November 14th 2008, Alfred Webre and Leuren Moret appeared on Sofia Smallstorm's "Expansion" programme on RBN \(Internet\)](#). ([This followed an earlier appearance by Webre on 31st October 2008](#), where Webre discussed the HAARP array.) Though there are many points of interest in this programme, the key segment from Nov 14th programme is repeated here for emphasis:

AW	...just run through 5 minutes why you think HAARP was the instrument that caused the molecular dissociation and the controlled ... disappearance of the World Trade Centre.
LM	Well, it was really Judy Wood's presentation which had the physical evidence and the photos which are not available – they haven't been ...
AW	Without... without referring to Judy Wood – in your own words – why do you think HAARP caused it?

Leuren Moret is introduced as a Geoscientist and she states she once worked at Lawrence Livermore Laboratories (though it is not made clear what her duties there were). Alfred Webre is introduced as an “international lawyer”. (It can be noted therefore, that neither speaker shares technical qualifications equivalent to those of Dr. Judy Wood).

At 43:40, she describes the Aug 2007 Madison Conference as “the most important 9/11 Conference that has happened”. At 44:40, she then describes the 13+ hour DVD as being available and notes that

“Judy Wood's presentation is the key to understanding how they carried out the destruction of the World Trade Centre Buildings.”

Leuren Moret then goes on to say:

“It involves Science – it involves the energy budget required to basically powder[ise] those buildings – huge buildings and the energy required to cause molecular dissociation of steel beams and concrete...”

Sofia then asks Leuren Moret to explain the term “energy budget” and asks

“how much energy does it take?”

to which LM responds (45:50)

“Well, huge amounts of energy – much more than chemical explosives would release.”

She then states that the buildings “turn to dust” – “going up in smoke” and she describes they were “basically being vaporised”. She states

“this requires very sophisticated beam weapons – huge amounts of energy.”

At this point, even though Webre had already discussed aspects of the energy question and 9/11 with Dr. Wood and John Hutchison some *9 months earlier*, he does not mention any of this. It is worth remembering that at the time, he seemed very interested:

Alfred Webre said on Feb 14th 2008, “...advanced technologies which have been developed at taxpayer expense which are for weapons applications, which could as easily be applied to new energy applications that would be to the benefit of the biosphere.”

Late in the discussion, Leuren Moret brings up the subject of the Minnesota Bridge Collapse and then states at 67:32 in the interview:

Judy Wood went up and looked at that bridge during the conference and she came back and reported to us at the conference that it was not a natural or a normal bridge collapse – she said it was taken down in sections.

We will see why this is noteworthy when a later broadcast with Alfred Webre and Leuren Moret on Co-Op (on November 17th) is discussed.

I highlight other “interesting” details in November 14th interview later, in an appendix to this article, but here I will list some points and questions.

Questions about Energy, Questions about Evidence

In the interview, why is Leuren Moret so focused on “the energy budget” for what happened at the WTC?

HAARP is a disclosed facility and its energy budget should be known or able to be known – in relatively specific terms. Leuren Moret does not give any figures for HAARP’s power consumption, nor does she attempt to quantify the energy used to destroy the WTC. She quotes no figures – at all. One figure that could have been quoted, even if there was a reason to suggest it was wildly inaccurate, was **3 megawatts** – as stated on this page - <http://www.gi.alaska.edu/ScienceForum/ASF13/1340.html>. Why didn’t Leuren Moret discuss these figures and, for example, dispute them?

- Moret states that she has done research, but she, unlike Dr. Judy Wood, does not appear to have a website – she does not give the address of a website where her research can be found – it is therefore apparently not available for public scrutiny.
- If HAARP was used to destroy the WTC, wouldn’t someone from the HAARP facility know this? If Moret thinks they would *not* know this, then why didn’t she describe or suggest how or why HAARP’s operation on 9/11 was covered up?
- Moret provides no evidence that HAARP was operational on 9/11, nor does she even describe any process by which she might have attempted to collect or discover this information.
- Moret states that she is a “Geoscientist”, but does not state why her particular expertise or knowledge qualifies her to be certain that HAARP was used on 9/11 to destroy the WTC.
- Why does Leuren Moret not comment on Alfred Webre’s instruction to her to “not mention Dr. Judy Wood”? (e.g. “Sorry Alfred, I am not sure why you are asking me not to mention Dr. Judy Wood?”)

- Why does Sofia not comment on the interaction between Alfred Webre and Leuren Moret and why does she not ask why Dr. Judy Wood “should not be mentioned” - when Sofia knows full-well that this is all a discussion of the evidence collected by Dr. Wood herself.
- Why has Moret *only now* started to say that HAARP was responsible for the destruction of the WTC on 9/11? Not only did she see Dr. Wood’s Madison presentation over 1 year earlier, she said she worked at Livermore Labs in the 1990’s and knew that HAARP was developed there. Why wasn’t she talking about HAARP and 9/11 months or even years ago?
- Leuren Moret seems to mix up laser technology and HAARP. She says that she witnessed a demonstration of the Shiva laser – but she does not describe any links at all between this project and HAARP. Indeed, lasers and HAARP are totally different systems and technologies – HAARP uses an array of antennae which generate Radio Frequency emissions whereas LASERS use a crystal or other source of radiation and generate a coherent, focused emission of energy. Is Leuren Moret confused about this, or is she trying to confuse the audience?
- Why doesn’t Webre mention *any* aspects of his discussion with Dr. Judy Wood and John Hutchison from the February 2008 interview? This is especially curious in view of the fact that he suggested during the interview then that they submit papers to the IEEE about their research. In February 2008, he also made comments relating specifically to weaponised free energy technology.
- If Moret is sure that HAARP destroyed the WTC, then why, approximately 66 minutes into the broadcast (linked above) does she state that she considers that mini-nukes could have been used (because of radioactive isotope traces found at the WTC site)? Why bring this up? (We now have the suggestion of Lasers, HAARP and Micronukes in this one broadcast.)
- If Moret is sure that HAARP destroyed the WTC, why didn’t she propose some action in relation to this conclusion or “proof”? For example, Dr. Wood has compiled her evidence into a *Qui Tam* case against NIST’s contractors. All speakers were aware of this too – why didn’t they discuss it, or some alternative action?

November 17th 2008, Co-Op Radio Broadcast with Alfred Webre

The date listed above is probably correct, though I could not establish with certainty whether this broadcast took place on the 10th or 17th of November. This programme contains a very similar discussion to that given on Sofia’s “Expansion” programme on the 14th of November, though there are some differences. One of the key ones is at 52:57, when Moret says:

You [Alfred Webre] were there with me at this conference in Wisconsin... just a day or two after the Minneapolis Bridge Collapse and some of the speakers went up to investigate the Minneapolis Bridge Collapse during the conference and they reported that there were similarities between that bridge collapse and events at the WTC or should I say evidence left at the World Trade Centre. For instance **one of the engineers reported that looking at the Minneapolis Bridge Collapse, it was a collapse that had never been reported or seen before and this engineer said that every bridge segment failed at exactly the same moment.**

This is a very peculiar description of the event – **why is Dr. Judy Wood not mentioned this time?** Only a few days ago, Leuren Moret seemed quite comfortable mentioning her name. Also, earlier in this broadcast, we did not hear Alfred Webre instructing Leuren Moret not to mention Dr. Wood’s name. Why was Dr. Wood’s name not mentioned? Was this a “dress rehearsal” for the next broadcast?

Webre ends the broadcast saying

You can go to www.peaceinspace.org to listen to this program and the audio archives of all the programmes. There will be there, as well, a complete outline with references... listed throughout this programme.

It is true that an overview of the presentation can be found on this page <http://peaceinspace.blogs.com/peaceinspaceorg/2008/12/my-entry.html#more>. However, no reference links to Dr. Wood’s research are included in the list of evidence itself. Lower down, the page includes these words:

The views expressed on the radio program are entirely those of the guest, independent scientist Leuren Moret. Email: leurenmoret@yahoo.com

Other Coop Radio guests who have conducted similar interviews in this area include Dr. Judy Wood and John Hutchinson. See: <http://www.drjudywood.com>

COOPRADIO.ORG: Dr. Judy Wood & Canadian Inventor/Scientist John Hutchison on 9/11 & The Hutchison Effect

http://exopolitics.blogs.com/exopolitics_radio/2008/04/coopradiorg--1.html

Listeners should contact Leuren Moret, Dr. Judy Wood and John Hutchinson directly with regard to any questions as to content, conclusions and overlap.

Why is this information right at the bottom of the programme listing and not at the top? Does Moret or Webre think “**overlap**” is a fair term to describe the way in which the evidence compiled by Dr. Judy Wood and some of it posted for over 2 years on her website(s) was taken and discussed by Moret for almost 3 hours (1 hour on 17th Nov, referenced above, and 2 hours on Sofia’s broadcast on the 21st Nov, referenced below) without any reference or credit to Dr. Wood? Is Alfred Webre trying to “duck responsibility” for being party to the copying of Dr. Wood’s research and trying to “offload the burden” onto Leuren Moret? Is he not capable of showing where all the points of evidence in the list were originally posted? If this was taking place in the sphere of conventional publication of materials – such as that related to music, literature, inventions or patents wouldn’t lawyers get involved with this sort of thing? Alfred Webre is described as an international lawyer so isn’t it amazing that he does not seem to have considered the ethics of this situation? Did he have a realisation of what he has condoned and participated in during this broadcast and in this web posting? Was his objective even to create a situation where Dr. Wood tried to further matters related to copying of material and ideas? It looks like this matter did not concern Alfred Webre at all, because a few days later, he completed a similar broadcast with Leuren Moret – and Sofia Smallstorm.

21st November 2008 – “Expansion” on RBN with Sofia Smallstorm

On November 21st 2008, Alfred Webre and Leuren Moret again appeared on Sofia Smallstorm's "Expansion" programme on RBN (Internet). The first 40 minutes, or so, of the programme is taken up with a discussion about the nature of the soul and aspects of how it is different to the physical body - and how parts of it may be electromagnetic in nature. Whilst this area is very interesting, and some of what Alfred Webre says I would agree with, this is an extremely speculative area and not one I wish to associate in any direct way with the study of 9/11 and the very important evidence compiled by Dr. Judy Wood over the last few years.

At 40:06 Webre then mentions HAARP again and links HAARP to 9/11. He introduces Leuren Moret (who has not yet joined the discussion) thus:

She has prepared an extensive outline that goes into detail on the specific application of HAARP at the World Trade Centre and shows that the footprint of the event that occurred at the World Trade Centre – as a matter of science ... corresponds to an electromagnetic event not to an explosive event

Alfred Webre does not reference Moret's previous inclusion of "Micronukes" in this part of the description, nor the "Laser demonstration" Moret said that she witnessed at Livermore Labs.

Sofia then says:

I know that certain listeners are interested to hear how HAARP was the agent of destruction at the World Trade Centre because I received some e-mails this week – so that'll be good...

At about 44:20 Moret says:

I really appreciate Alfred and you discussing the energy issue – the electromagnetic issue. We can call it the energy budget and that is the very key to understanding what happened at the World Trade Centre on 9/11. There are many aspects of the energy budget that can be looked at and each of them gives us more information or clues about what really happened.

Two large problems soon become apparent in the ensuing presentation (almost a monologue by Leuren Moret). The first is that Leuren Moret uses no science or analysis to directly or even indirectly link the points of evidence she discusses to any of the disclosed or suspected capabilities of the HAARP array.

The second problem is that the detailed catalogue of evidence she recounts is, without exception, the list compiled by Dr. Judy Wood, one to two years before the airdate of this broadcast. It is referenced without any mention of Dr. Wood's name, website, or any of the additional studies she has compiled which have built on this evidence. To me, the strategy being employed here entirely fits with the concept of (a) muddling the evidence (b) attempting to "take ownership" of the research of Dr. Judy Wood and link it to something which it does not "fit" – **at all**.

Further details of this interview are examined in the appendix, but here, I will list, along with approximate time codes, the points of 9/11 evidence that Leuren Moret discusses. To understand the full significance of this, the following links need to be reviewed:

Dr. Wood's Madison Presentation – [Part 1](#) and [Part 2](#)

Dr. Wood's "[Star Wars Directed Energy Beam Weapon](#)" Series

Dr. Wood's [WTC Dirt Series](#)

44:39	Seismic Data
49:47	Says of the destruction of 1 of the WTC towers that it... "It just looks like a drinking fountain of dust... "
52:25	24 foot Circular holes evidence of beam weapon (refers again to Livermore 1990 demonstration again and says HAARP was developed there starting in 1976 with the Russians)
55:25	60 foot hole in Liberty street.
56:50	Dust stops and goes up - indicates molecular dissociation
56:35	Unburned paper, then toasted cars
60:20	Missing door handles in cars and missing engine blocks, paint effects.
61:30	She has discussed melted or missing metal and unburned paper and then she says "what in the world physically happened that could create phenomenon like this? And I don't have an answer, I don't know what happened." I thought she said it was HAARP...?
62:25	"Instant Rust" appearing.
63:25	Warner Brother figures and PATH train almost undamaged in WTC basements.
64:00	Detail on Cahill dust study. Moret then makes some comments on Cahill's dust study and includes reference to the same paragraph posted on a page of Dr. Wood's Erin Series
69:50	Dirt trucks
70:00	Scrubbing the streets and dump trucks and dirt piles getting higher.
71:00	Fuming without fires, boots, molecular dissociation of material.
72:00	Doctors reaction to "missing bodies".
73:02	Reports that William Rodriguez is a friend of hers and that he reported there were no fires in the building (however, Rodriguez did report explosions in the basement).
74:25	Moret states "iron rusts, steel does not rust" (technically not correct), she mentions USGS dust study not being trustworthy due to exclusion of sampling sites. References 1 micron dust particle size and states that it takes "huge amounts of energy" to create dust like this – <i>this is not what Dr. Wood stated</i>
77:00	States that photos have been altered and that this has affected the colour of the dust seen, but she does not give specific details.
78:00	Comparison of demolition of Seattle dome.
78:40	Lathering up of WTC 1,2 and 7 before collapse "it was probably the beam weapon or some kind of a physical process happening that was necessary for the beam to work properly."
79:20	"they were already preparing building 7 before building 2 went down"
79:40	Freon tanks.
84:30	Moret says: "I'd just like to read a comment - this came off a forum on the internet, so there's no author" she then reads Steve Warren's quote, as used in Dr. Judy Wood's Madison presentation - where she credited the author on her slide – as Dr. Wood does on her Website.

In all of this discussion neither Alfred Webre, nor Sofia Smallstorm make any mention of Dr. Judy Wood, her Madison presentation or her Website – let alone the later research about the Hutchison Effect and Hurricane Erin, which provides a far greater evidence-base to determine what actually happened on 9/11.

Why do neither Webre or Sofia, who both know that this is Dr. Wood's research - and have both been made fully aware of the later research, make **any comments whatsoever? What's wrong with this picture?**

So, again, what verifiable evidence is missing from this discussion? In considering this presentation and what it excludes, can we conclude that the cover up and muddle up is still in progress?

Sofia closes the programme saying:

Some day I will do another show discussing all that I have accumulated in my research and how it fits with some of what Leuren said and how it may not fit with other parts of that...

Again, there is no mention of the most profound and fundamental evidence that Dr. Wood has uncovered since August 2007. In relation to the Moret's conclusion that HAARP played a big part in the events of 9/11, it can be asked:

What evidence did Moret supply that HAARP was responsible for the destruction of the WTC towers?

What specific characteristics of HAARP did Moret describe that made her draw the conclusion HAARP was employed?

For example, [Dr. Wood's study matches specific Hutchison Effect characteristics \(bending of metals without high heat, levitation, rapid rusting of steel\) to specific evidence at the World Trade Centre.](#) Leuren Moret did no such thing! She simply listed Dr. Wood's evidence and then said "HAARP did this." How on earth can Sofia and Alfred Webre have failed to comment in any way on a presentation which was so weakly founded and so obviously copied? I leave the reader to make up their own mind.

Is this a Heist? Is this a Cover Up?

I repeat the question - why was Dr. Judy Wood's name or Website not mentioned *at any point*, by Webre, Moret or Sofia on the latter November 2008 broadcasts? Could this be seen, due to the amount of evidence presented and its important nature, to be an attempt to keep it all covered up?

My conclusion is that the Hutchison Effect and Hurricane Erin are the most important aspects of the studies completed by Dr. Wood – as these are the topics that almost no other 9/11 researchers will candidly discuss. I would strongly contend that, by repeatedly mentioning HAARP when they should "know better" and completely excluding any discussion of the Hutchison Effect and Erin the studies posted by Dr. Wood, Leuren Moret and Alfred Webre have decided to deliberately participate in the same "muddle up" of 9/11 research and

evidence. Some will say “oh – it’s just a disagreement over evidence and they’re entitled to their own opinion and conclusion” – each person is, of course, free for themselves to have this view if they wish, but the catalogue of evidence I have presented here forces me to vehemently disagree with such a view.

Sofia’s failure to mention Dr. Wood’s work – when she has been advised about the Hutchison Effect and Hurricane Erin studies also tells me something. ([Sofia also herself interviewed Dr. Wood on 10th March 2007](#). If you listen to the Dr. Wood/Sofia interview, they did, indeed, discuss things like the WTC dust, and the lack of material, the problems with the molten metal stories, straight vertical holes in the buildings and the street.) Sofia has also seen Dr. Wood’s Madison August 2007 presentation – which contains all the evidence that Leuren Moret went through. Why then, in the interview with Moret and Webre, did not Sofia (or Webre) comment *at all* about this? Was it simply that she was afraid of “creating conflict” with her guests? In view of the fact that Leuren Moret was happy to mention Dr. Judy Wood’s name on the 14th and did not do so on the 21st, this explanation does not seem satisfactory. Therefore, is Sofia a willing participant in the “muddle up”? Or did she just “not notice” what was going on in her radio broadcasts?

Dr. Judy Wood E-mails Alfred Webre and Leuren Moret

In an attempt to determine why Leuren Moret did not make sufficient attribution to Dr. Wood at the appropriate points, [Dr. Wood e-mailed her](#) and she further requested that specific attribution be made to her research in the future. [Leuren Moret responded saying:](#)

I believe your information presented at Madison is one of the most important ones ever presented on 9/11, I have made every attempt to widely circulate awareness about your information. I don't need to steal anyone else's information, this is something quite different, it's actually a strategy to get your information out.

Moret added:

As soon as I mentioned your name in the interview as the starting point for my comments - the electricity was cut off in my house and the phone line went dead. Any time your name is mentioned in interviews, the same thing happens.

As you will hear if you listen to the interview, and can see from the transcribed segments, on the 14th of November RBN broadcast, the phone interview continued even after Leuren Moret had mentioned Dr. Wood’s name several times.

Remembering the Goal

Let’s remember the goal of studies like Dr. Wood’s – it’s to establish *what happened* by examining *the most evidence* and then tying the explanation to known phenomena. Point for point, Dr. Wood’s studies and general conclusions explain the evidence more completely than any other study that is publicly available. Is Sofia relying on popularity rather than the best match of evidence to explanations? Or should we all simply “vote for truth” on these issues (as so many people seem to be doing)?

The Reality of Free Energy Technology

In relation specifically to free energy technology, why did Alfred Webre, at the Madison Conference in his presentation on 05 Aug 2007 (in relation to solving global problems), say this

3. Shift to new breakthrough energy technologies - moving beyond petroleum and nuclear which are the principal tools of the war crimes organisation - to breakthrough fuel-less non-polluting zero point energy technologies that are now sequestered in the National Security State.

...and then say this to Dr. Judy Wood and John Hutchison on 14th Feb 2008:

[behind the black budget projects there are these] “advanced technologies which have been developed, at taxpayer expense, for weapons applications, which could as easily be applied to new energy applications that would be to the benefit of the biosphere.”

Later in the same interview/discussion he says:

“whatever technology did this should be disclosed”.

So why would he completely omit any discussion of free energy technology and the Hutchison Effect in his November radio interviews/discussions? What changed between February 2008 and November 2008?

Conclusions

1. Having considered and analysed the evidence here, I can only sensibly draw the following conclusions. These conclusions will not be popular in some quarters.
2. There has been a deliberate and co-ordinated attempt to marginalise or even cut out Dr. Judy Wood's name from the discussion of 9/11 evidence and research.
3. There has been a deliberate attempt to cover up and/or muddle up the specific nature or characteristics of the Directed Energy Weapon or Weapons which were used on 9/11, by excluding discussion of John Hutchison's experiments in relation to key 9/11 evidence.
4. There has been a deliberate attempt to cover up and/or muddle up the evidence which strongly indicates a link between free energy technology or technologies which work, have been weaponised and used on 9/11. An example of this was when Leuren Moret kept referring to “the Energy Budget” and several times referred to “large” or “huge amounts” of energy being required to cause dustification and molecular dissociation of the materials from which the WTC was constructed.
5. There is a great reluctance to discuss specific legal action in relation to 9/11 – especially Dr. Wood's Qui Tam case against NIST's contractors.

6. In this matter, people that should “know better” have gone beyond any reasonable point where one might consider they just “disagree” with Dr. Judy Wood or “do not understand” what she has “put on the table”.

So, how will the “average person” know how to discern which Scientist is being truthful? How will they discern which scientist is discussing the most powerful and most complete set of evidence and drawing the most accurate conclusions?

To re-emphasise, I conclude that all the evidence documented above strongly suggests or even proves that there is a wish to cover up knowledge of Hurricane Erin’s presence on 9/11 and its likely role in the field matrix which was in place in NYC on that day. I also, therefore, additionally conclude these things:

7. Advanced Directed Energy Weapon technology was used on 9/11 to destroy most of the WTC complex – as Dr. Wood has been saying since September 2006 (when her “beam weapon” study was first posted).
8. This technology exploits “free energy” in a way similar to that discovered by John Hutchison – as Dr. Wood has been saying since about January 2008.

More importantly, what will you conclude?

APPENDIX – FURTHER NOTES ON AND TRANSCRIPTIONS OF AUDIO PRESENTATIONS

Here I include further notes and transcriptions I compiled on the audio presentations relevant to this article.

Leuren Moret - Madison – 5th Aug 2007

Leuren Moret says:

50:45	"I worked in 2 nuclear weapons laboratories – I had no idea what I was doing there – I'm a geoscientist – it was just a job. A I worked at the Livermore Nuclear Weapons Lab from 1989 – 1991. And I had absolutely no idea what a nuclear bomb was – it was just something they made there..... In 1991 I became a whistleblower at Livermore and I survived the Karen Silkwood experience.
-------	---

Moret talks about culture of death in the Nuclear Weapons research and then she talks about Ghandi. She

talks about Hawaii who may start a DU bill. She mentions how people around the world are interested in 9/11 and that she went to Oct 2006 Tokyo conference. She said they're crazy about 9/11 in Italy.

She shows a video of herself on Hawaii news in relation to the apparent use DU there by the US Military (for training or testing purposes).

She infers Alfred Webre gave her "legal information". She says "don't ask me how this happened ... I never plan anything."

On 9/11, Moret says she called Janette Sherman 12 miles down-wind from Pentagon – Janet said radiation levels were elevated, but Moret showed no graphs of radiation or evidence of DU at the pentagon.

Moret she says she got involved in 9/11 and found that there are many players who want to "keep people focused on the WTC". She mentions someone in the EPA by the name of Bellingham who apparently said that the Pentagon site was contaminated with radiation (probably from DU).

At 65:05 Moret states that The Pentagon is the Achilles heel of 9/11 [Applause] – because there's no one else involved there except the military. She says Doug Rokke supplied photos of Pentagon to her – they agreed DU was in a cruise missile which hit the pentagon.

She references Patriot Act and the encroaching Police State and says 9/11 was about Oil and Resources and to establish a military presence in Central Asia.

Alfred Webre - Madison Aug 05 2007

Alfred Webre talks about the “Alien Invasion False flag”. He mentions the role of the City of London and other entities, as well as the “depopulation agenda”. He mentions Dr. Wood’s presentation regarding Directed Energy Weapons at least 3 times.

The depopulation matrix is designed to be activated by a 9-11 style false-flag state terror attack against a major urban centre in the US. Possibly using nuclear, biological weapons or advanced exotic weapons such as directed energy weapons – which I think Dr. Wood has done a magnificent job of... really holding her space and... [applause] ... bringing us to this.

...we've had the terror attack in New York using, most plausibly, directed energy weapons of some sort. OK? We've had the Hurricane Katrina false flag operation using most plausibly directed energy weapons or HAARP to teleguide the Hurricane right into New Orleans...

*“First of all I'd like to congratulate again Dr. Judy Wood because I think she's proved, *prima facia*, that 9/11 by itself tonight was a crime against humanity through the use of an advanced exotic weapon. OK?”*

He references Minneapolis bridge being taken down with a Directed Energy Weapon. Webre refers to and demonstrates understanding of various laws relating to constitution.

He asks the question “How do we get out of this mess?” and says, as part of his answer:

3. Shift to new breakthrough energy technologies - moving beyond petroleum and nuclear which are the principal tools of the war crimes organisation - to breakthrough fuel-less non-polluting zero point energy technologies that are now sequestered in the National Security State.

He refers to space based weapons and talks about War Crimes tribunal.

“I believe that Dr. Judy Wood and the evidence she presented here will be a worthy witness at a citizens’ international war crimes tribunal – so this is going forward.”

He mentions of calling for a Truth amnesty process when he was to speak at the X-Conference in Washington DC on 14th Sept 2007.

Leuren Moret Speaks in the Q & A After Webre’s Talk

Leuren Moret recounts the experience of witness the laser demonstration.

“I was an Amber beam 25 feet across going straight up into the sky and I said “what is that” and [the student] said “oh they’re making a star” with a laser beam –

making a star – and what I realised when I saw Judy Wood’s presentation this evening is that that could’ve been the prototype for whatever the weapon was that they used at the world trade centre. And they kept all air traffic away from that beam for a 5-mile radius”

How is this truly relevant to Dr. Wood's presentation?

Webre's Co-Op Radio Show with John Hutchison and Dr. Judy Wood

This was recorded Feb 14th Feb but not broadcast until April 2008.

<http://peaceinspace.blogs.com/911/2008/11/911-energy-budget-and-molecular-dissociation-of-the-world-trade-center-wtc-by-independent-scientist-leuren-moretcanada.html>

The original audio file that was posted was very large – over 90 MBs for a recording of 1 hour 7 minutes – it was sampled at 192 kbps. Other broadcasts were on his blog were sampled at 32 kbps – making them approximately 15 mbs in size (i.e. much easier to download). The audio was also difficult to listen to, with Webre and John Hutchison's voices being fairly quiet and Dr. Wood's voice being much louder. I therefore used dynamic range compression on the audio, once I found that it had been posted and Alfred Webre posted a link to the version which I processed and down-sampled to 32kbps to make it easier to download.

As far as I am aware, when it was broadcast on air (in April) in a 1-hour slot on Co-Op radio, the last few minutes was simply cut, with no closing remarks or suitable editing.

They commence by discussing the “boat video” and the instances of spontaneous combustion it shows.

Alfred Webre does cover a number of the key points of evidence, such as the buildings turning to dust. He does not really ask any detailed questions about things like the levitation or the transmutation of material (steel turning into iron and then rusting), though he observes it is “like a form of alchemy”. Webre remains fairly quiet when Dr. Wood compares the rusting observed in the aftermath of the WTC with that observed in one of John Hutchison's stainless steel samples.

Around the 28-minute mark, John Hutchison describes the relatively low power levels used in his experiments (from 75 watts to approximately 2 kilowatts), and Webre acknowledges that this is a very significant finding. Webre mentions that he had spoken to a professional electrical engineer who had said it would require an enormous amount of energy to “poof” the WTC buildings.

John Hutchison then gives a general overview of his understanding of how the Casimir force and the Weak Nuclear force in

“What we’re operating is ‘key ways’ into perhaps a Casimir realm and the sub-atomic realm. We have RF [radio frequency] generating equipment, electrostatic generating equipment along with weak nuclear forces, which are combining and linking up in time and space and opening up a ‘gate’ so that the Casimir energy

can flow in and do whatever... energy is required to cause these effects, like taking bars and twisting them into knots. It's a key, using very little energy – a key to open up a sort of gateway, where this energy can come in – in time and space – to wherever it's needed."

So the energy issue has been discussed with and presented before Webre and he has acknowledged the significance of John Hutchison's findings.

Dr. Wood discusses the apparent temperature drop in some instances – where people described the WTC cloud as slightly cooler than the ambient temperature (rarely do they describe it as "burning hot") and John Hutchison confirms that in some cases, his own metal samples appear to be cool, immediately following one of his experiments. Webre acknowledges this aspect is "fascinating".

He does mention the legal challenge to NIST

Around the 41:50 mark, Webre says

"It seems to me that you now have documentation that you could put together in papers that would be published by... accepted journals such as the IEEE. I mean, you're dealing with comparisons between laboratory effects and field effects."

(Dr. Wood then alludes to the time it takes to compose such papers and Webre seems to acknowledge this.)

At 43:00 Webre says

"It seems to me that in this paper you achieve a new threshold and that is to have what we could almost call a laboratory control".

Dr. Wood adds "proof of concept" and Webre repeats this phrase. Webre acknowledges that this brings in a "whole new standard of expression" to the audiences for this material. He describes types of audiences such as a public audience, a judicial audience, a legislative audience, a research audience. And then he says, perhaps light-heartedly, "Gee, when are you guys going to make your first TV documentary?".

Around 44:25, Dr. Wood suggests "an amazing technology was used [on 9/11]" and Webre says "yes". Webre also appears to agree when Dr. Wood suggests that the technology could be used for good things – he says that her suggestion is a "very profound statement". Webre then suggests (around 45:30) that behind the black budget projects there are these "advanced technologies which have been developed at taxpayer expense which are for weapons applications, which could as easily be applied to new energy applications that would be to the benefit of the biosphere." He says "whatever technology did this should be disclosed". John Hutchison also expresses his wish for the technology to be disclosed and that his method of doing this is to appear in TV documentaries about the subject.

Later at around 53:40, Dr. Wood revisits the issue of "weird fires", but Webre makes no comments in this segment.

Dr. Wood and Webre then discuss (at around the 57:00 mark) the ongoing effects at Ground Zero and Dr. Wood discusses how she got a sort throat on a recent trip to New York and she considered this to be in part caused by the ongoing effects at Ground Zero.

At 60:15, Webre says "In a way, the attack is still continuing because the process is still continuing" and he agrees when Dr. Wood says this has got to be a "health risk". He said that he felt this was also relevant at his appearance at a 9/11 anniversary conference in 2007 where there was a discussion about the refusal of government at all levels to compensate first responders and residents for damages to health caused by 9/11.

At the end of the interview, Webre says "This hour has gone by so quickly and I hope that you'll come back and visit us again" and Dr. Wood says she would "love to".

Expansion 14th November 2008

On 14th November 2008, Alfred Webre appeared with Leuren Moret on Sofia's radio show "Expansion" on the RBN.

Sofia then states that she has invited her guests to discuss HAARP in relation to 9/11 and Leuren Moret states that she wishes to ask "who benefited" from 9/11. At 5:50 Moret says she wants to look at "where it happened – the Pentagon, The World Trade Centre and Shanksville and then how... that's where you have to look at the science of molecular dissociation and the... energy budget required."

Moret then says she concludes from various comments that "it was pretty clear it was the US, the UK and Israel – all 3 of these entities were involved in almost every aspect of 9/11". Around 9:10 Moret mentions London bankers, but does not name specific individuals only "the London Bankers – the international bankers – the Rothschilds as the public and the oligarchs in the United States".

At 24:54 Moret says that the strike on the Pentagon is tied into HAARP because the Navy have command and control of HAARP and it was one of their intelligence offices that was hit. (However, she states that it was a missile that hit the Pentagon, partly according to information she'd received from Major Doug Rokke)

At 43:40, she describes the Madison Conference as the most important 9/11 Conference that has happened. At 44:40, she then describes the 13+ hour DVD as being available and notes that "Judy Wood's presentation is the key to understanding how they carried out the destruction of the World Trade Centre Buildings." She then goes on to say "It involves Science – it involves the energy budget required to basically powder[ise] those buildings – huge buildings and the energy required to cause molecular dissociation of steel beams and concrete..."

Sofia then asks Leuren Moret to explain the term "energy budget" and asks "how much energy does it take?", to which LM responds (45:50) "Well, huge amounts of energy – much more than chemical explosives would release." She then mentions the buildings turning to dust, going up in smoke and also basically being "vaporised". She states "this requires very sophisticated beam weapons – huge amounts of energy."

At this point, even though Webre had already discussed aspects of the energy question and 9/11 with Dr. Wood and John Hutchison some *9 months earlier*, he does not mention this. It is worth remembering that at the time, he seemed very interested:

“...advanced technologies which have been developed at taxpayer expense which are for weapons applications, which could as easily be applied to new energy applications that would be to the benefit of the biosphere.”

At the 48:00 mark, Sofia re-states her interest in the “energy budget”, but also does not bring up the Hutchison Effect – which I had advised her about in e-mails sent in August 2008, which she had acknowledged receipt of. LM then discusses with Sofia the ideas of “Pancake Collapse” and Controlled Demolition and the associated energy budget – but neither of them brings up the relationship to the Hutchison Effect. LM mentions how Dr. Wood’s presentation used various photographs to demonstrate there “was no collapse” of the WTC towers – but she incorrectly states the buildings “went up in smoke”.

Sofia then asks (51:34) if there is

“any allowance for chemical explosives... RDX, thermite assisted...?”

Moret states

“there was physical chemical evidence that thermite was present, but when you see Judy Wood’s presentation – the colour of the smoke was altered in photos to ... and people were conditioned to keep repeating thermite but she said the buildings were vaporised from the top down”.

Sadly, Moret misquotes and muddles Dr. Wood’s presentation – in which Dr. Wood notes the colouration of the smoke, but does not state that its colour was altered, nor does she state that the building was “vaporised”.

Sofia mentions how Thermite was introduced into 9/11 research by Steven E Jones, but then Moret asks Alfred Webre into the conversation “because now we’re going into HAARP and molecular dissociation and the energy budget”. Webre then states he wants Moret to finish her presentation before he comments. He states that he thought the discussion had got caught up in “the semantics”.

Moret then states it was the intelligence agencies from the USA, UK and Israel that carried out 9/11.

55:39	AW	...just run through 5 minutes why you think HAARP was the instrument that caused the molecular dissociation and the controlled ... disappearance of the World Trade Centre.
	LM	Well, it was really Judy Wood’s presentation which had the physical evidence and the photos which are not available – they haven’t been ...
	AW	Without... without referring to Judy Wood – in your own words – why do you think HAARP caused it?
	LM	There were some... first of all where was that building rubble that should’ve been 35 stories high? Those were 500,000 ton buildings – that just basically went up in smoke... they just disappeared. And I know as a Geoscientist that a tremendous amount of energy was needed to basically vaporise or dustify those buildings and I observed in Livermore, as a Livermore staff Scientist - in the

middle of the night - a demonstration of laser beam weapons, so I have actually seen a demonstration ... by Livermore – which is where HAARP was developed secretly in collaboration with the Soviet Union beginning in 1976, so I know the weapons exist, I know the applications – I have observed them and looking at the World Trade Centre destruction – as a geoscientist – I know that the keys to understanding what happened at the World Trade Centre are the energy budget needed to molecularly dissociate those two buildings. That's exactly what the physical mechanism was that was used to destroy those buildings.

Moret does not distinguish between the beam weapon she states she witnessed and the fact that HAARP is described as a “phased array” and an “ionospheric heater” in the actual specifications which are available on its website.

At 59:20, Sofia asks Moret if she knows how Dr. Wood got access to photos that were not in the public domain. Moret then *speculates* that Dr. Wood went to conferences where “government representatives” were showing photos. She suggests Dr. Wood went to “NIST hearings” and “probably to the library of congress and went through their collections online”.

Strangely, neither Sofia nor Leuren Moret actually think to ask Dr. Wood herself this question and neither do they refer to or visit her Website, where the majority of photos are *referenced* anyway.

At approx. 60:40 Sofia states that Dr. Wood

“has seen, I believe, more than anyone on Earth more photos of the World Trade Centre demolition than anyone else that I’ve ever heard of.”

At 60:45, Webre states to Moret

“You’ve shown of instances where HAARP has been used in environmental warfare such as hurricanes [yes], earthquakes, cyclones. We also know that HAARP is used for scalar energy warfare against land and population targets...”

Moret then says

“A very good example is the Kashmir earthquake of 2005.”

Webre interjects

“No, not tectonic warfare [oh] not environmental warfare – scalar energy warfare against land and population targets including cities, industrial sites – to bring down portions of cities. To bring down buildings. To bring down industrial sites. OK? To bring down individuals.”

(Why is Webre asking Moret to describe this – it sounds like he has some information in front of him, so why can’t he discuss it?) At the time of writing [googling “leuren moret HAARP”](#) brings up only links to Alfred Webre’s blog, and a few other blogs. Leuren Moret does not

appear to have her own Website (unlike Dr. Judy Wood) and therefore I am not sure where she has “shown of instances where HAARP has been used in environmental warfare”

Also listen for the unusual reference to the Alfred P Murrah (APM) Building being destroyed by HAARP. At 63:25, Moret states

“There are indications that HAARP-type space weapons were used at the Murrah Building in Oklahoma City.”

It is worth noting that HAARP is not a space weapon – it is a ground-based array in Alaska – but Moret is not given a chance to clarify or correct this statement –

Webre asks

If scalar energy weapons were used there, how would one know whether it was HAARP or not?

Moret responds

Well if... the particle size and the energy budget is the whole key to understanding what technology was used to destroy a building.

Webre says

Right, exactly. What other candidates would you have in mind, other than HAARP that would've been used at the Alfred P Murrah Building?

Moret then states that because of radioactive isotope traces at both the WTC and the APM building, she considers that mini-nukes could have been used and states that high levels of Uranium were found at the WTC site, but does not reference any specific data sources.

I have previously posted an e-mail exchange I had with another proponent of the WTC mini-
nuke theory, and the same arguments and rebuttals apply to Moret's suggestion here.

Sofia then brings up (at approx 66:00) the subject of the Minnesota Bridge collapse and Webre comments that it happened on the eve of the Madison Conference and that he had seen it from the air.

Moret then states 67:32:

Judy Wood went up and looked at that bridge during the conference and she came back and reported to us at the conference that it was not a natural or a normal bridge collapse – she said it was taken down in sections.

Interestingly, starting around 69:50 Webre states that one of his classmates at Yale was John Ashcroft whom he met in Washington DC following an appearance Webre made at the X-Conference. Webre stated that he had a conversation with Ashcroft (whom, according to

Webre, some may have described as “the arch-demon”) which was very civilised and that they came out of polarities into a “spirit of truth and reconciliation”. Webre suggested that this may be where the future in all this would lie (and I don’t disagree with this – but it does require people to be truthful).

Interestingly, at around 63:55 Webre states:

9-11 was planned going back to the early 1970's – if not before. The World Trade Centre towers were probably built already with 9/11 planned ... in mind... one was called David and the other was called Nelson – around the Rockefeller brothers. I grew up around these guys. Dick Cheney who was the chief operations officer of 9/11 was a year ahead of me at Yale... George W Bush was a couple of years behind me. I used to go up to Maine right up to Rockefeller's estate. I was inside on the Rockefeller operation and this inside board operates from an upper theatre masonry, such that they would be developing ... using their front companies like SSAIC [SAIC?], like the Livermore labs to develop the technologies like HAARP that would knock down their twin towers that they built in order to be knocked down...

77:00 Webre states that he became involved in “public interest counter intelligence” (which he states earlier in the interview is his elaborate name for researching ‘conspiracy theories’) on Nov 22nd 1963 as he was a member of the board of members of the Assassination Information Bureau.

At 79:05 Webre states

I'm fairly convinced it was HAARP because HAARP was a central part of all psy-ops – it's used for earthquakes, ye know, it's kind of like – it's good for what ails you if you're in the psy-ops business. 9/11 was the major psy-ops of the Bush era. It was in the planning... we have eyewitnesses that place Donald Rumsfeld planning 9/11 as early as 1971...

At 80:00, Webre states:

The Twin Towers themselves were designed for 9/11...

and then he goes into a discussion of the Kennedy Assassination. This does not really add anything to the discussion of how HAARP was used to destroy the WTC – which was what the topic of conversation was meant to be.

Webre then discusses how “the book is going to be closed on 9/11” with the change of US presidential administration, though he acknowledges that “it can't be forgotten about” when Sofia mentions “the larger picture.”

Are they interested in exactly what happened? Why have they discussed so little specific evidence – no specific documents.

Webre then suggests at 85:40

So now, I think that we're in an era of re-framing it [9/11] and so that's why I think it's necessary to really highlight it in terms of HAARP, in terms of the space-based weapon of mass destruction and really focus on HAARP and on banning HAARP as the principal weapon of the conspiracy, because as long as HAARP continues they'll have the human mind... they can make jelly and mincemeat and carry out all of their plans to compromise elections to make governments jelly...

Webre clearly thinks HAARP is a formidable weapon. Sofia does not really pick up on any of the statements Webre makes nor does she ask him to substantiate them with evidence or clarification.

Expansions 21st November 2008

After the first 40 minutes, Webre links HAARP to 9/11 again and asks Leuren Moret:

She has prepared an extensive outline that goes into detail on the specific application of HAARP at the World Trade Centre and shows that the footprint of the event that occurred at the World Trade Centre – as a matter of science ... corresponds to an electromagnetic event not to an explosive event

Alfred Webre does not reference Moret's previous inclusion of "Micronukes" in this part of the description. Sofia then says

I know that certain listeners are interested to hear how HAARP was the agent of destruction at the World Trade Centre because I received some e-mails this week – so that'll be good...

At about 44:20 Moret says

I really appreciate Alfred and you discussing the energy issue – the electromagnetic issue. We can call it the energy budget and that is the very key to understanding what happened at the World Trade Centre on 9/11. There are many aspects of the energy budget that can be looked at and each of them gives us more information or clues about what really happened.

Moret references the Seismic data from 9/11 and how it does not show the sort of signal expected by the 2 buildings coming down. She references the kinetic energy that would have been liberated as the building came down and states at 44:39:

It's nowhere on the seismic record.... Where did all that energy disappear to?

This represents a subtle change to the question "Where did the building go?" i.e. Moret references the expected energy of impact of the material before referencing what happened

to the material itself. (The lack of material is the more obvious problem, once video and photo evidence is studied carefully.)

At 44:53 Moret says:

The size of the dust particles in the material that was released as the buildings went down required tremendous amounts of energy to produce those very tiny particles – to break all the chemical bonds... in the building material... where did that energy come from?

She talks about the energy required to break the bonds and how this would be much greater than the kinetic energy involved in constructing the building (i.e. much greater than the energy released by a gravity-driven collapse) and she re-iterates the energy discrepancy.

Moret says at approx 49:47

*It was obviously not a controlled demolition... the buildings erupted into an emulsion of dust particles – there was no rubble that hit the ground if you watch the videos... It just looks like a **drinking fountain of dust** from the top of the building down and much of the dust went directly up into the atmosphere and there are actually satellite images showing the dust going up into the upper atmosphere immediately...*

Moret then mentions the paucity of debris and then she says

There were buildings very closely located right next to the World Trade Centre buildings and there was absolutely no damage done to them

Moret fails to mention the Banker's Trust building, its repair and subsequent dismantling.

She mentions the laser project called Shiva at Livermore – brief research I completed on this suggested that this was something used as part of Fusion research project rather than it being a weapon of some kind, although I would admit that with “black projects”, the picture is never clear. Nevertheless, why is Moret bringing this into the discussion without more evidence? What, according to Moret, did the damage at the WTC – a laser or HAARP – or both?

At 55:25 Moret starts to list the evidence compiled by Dr. Wood. After the break, at 66:35 Sofia says

We are listening to Leuren Moret recount the many bits of evidence that suggest or point to electromagnetism as the demolition force at the World Trade Centre in 2001, rather than explosives... and I am itching to ask you questions because there are so many things I am hearing that do not connect with my own experience – I did make ‘9/11 Mysteries’ – I was immersed in this research for a year...

Moret then makes some comments on Cahill's dust study and includes reference to the same paragraph posted [on a page of Dr. Wood's Erin Series](#). She then lists more of the evidence compiled by Dr. Wood without crediting Dr. Wood.

Note: HAARP isn't a beam weapon – it's a phased array of antennae! It is unclear if it has a weapons application. No contribution from Webre.

Sofia closes saying

Some day I will do another show discussing all that I have accumulated in my research and how it fits with some of what Leuren said and how it may not fit with other parts of that...

Webre and Moret on Co-Op Radio, November 10th or 17th 2008

Moret speaks continuously for over 15 minutes about "whodunnit" and references an article by General Ivashov - "International terrorism does not exist" (I agree with the thrust of this)

At 20:52 Webre states:

I think we should shift over to the issue of how HAARP was involved in 9/11 because I think that is the new information and also it's the information that very powerful forces have desperately been trying to keep from public view.

Moret responds:

That's for sure. That's for sure.

She continues:

I am a Geoscientist so I am approaching the World Trade Centre event from an interdisciplinary scientific background...

The Chambers English Dictionary (1996, CD-ROM edition) defines Geoscience as:

any of the scientific disciplines, such as geology or geomorphology, which deal with the earth, or all of these collectively.

However, no one makes it clear what Moret's area of expertise is, but [Wikipedia states](#):

She earned her Bachelor of Science in Geology at University of California, Davis in 1968, and her Master of Arts in Near Eastern Studies from University of California, Berkeley in 1978.

Does this qualify her to speak with authority on the details of how HAARP destroyed the WTC?

At 23:00 she repeats that she is looking at "The energy budget" and the molecular dissociation and the energy required to make this happen. Mentions kinetic energy issues (potential energy converted back to energy).

At 33:05 she talks about spontaneously combusting cars again and says

...that's also evidence of some new strange phenomenon that takes a lot of energy pumped into a large area to spontaneously combust 25 or 30 cars.

At 34:40 Webre says:

I think that what you're doing now is that you're beginning to show... those aspects of the evidence which demonstrate that what occurred at the World Trade Centre site on September 11th was most probably the result of a directed energy weapon like HAARP.

35:43 Webre continues:

It's an overwhelming case in my opinion.

At 44:47 Moret states

With a nation of scientists they could've called on to come in and help to analyse what happened at the World Trade Centre - instead they've used dishonest scientists to really cover up what happened.

At 47:23 she refers to USGS describing WTC beams as iron (as Dr. Wood did in her Madison presentation). At 52:57 Moret says:

*You were there with me at this conference in Wisconsin... just a day or two after the Minneapolis Bridge Collapse and some of the speakers went up to investigate the Minneapolis Bridge Collapse during the conference and they reported that there were similarities between that bridge collapse and events at the WTC or should I say evidence left at the World Trade Centre. For instance **one of the engineers reported that looking at the** Minneapolis Bridge Collapse, it was a collapse that had never been reported or seen before and **this engineer said that every bridge segment failed at exactly the same moment.***

Moret doesn't say HAARP was responsible for the destruction of the bridge. At 56:20 Moret again incorrectly states that Steve Warren's quote is "anonymous".

[Steve Warren's quote] "We stand at the beginning of a new age. Our government has in its hands a method of disrupting the molecular basis for matter, and its first

impulse was to weaponize it. Is this so hard to understand? Like splitting atoms to create destruction was so hard to understand in 1945?"

She then “breaks into” the quote saying:

And so now Alfred instead of the Manhattan project, we have the HAARP project which is a new and improved model which makes it possible to carry out electromagnetic warfare – geomagnetic warfare.

Moret then continues with the quote thus:

Of course this new "invention" came when the United States ruled supreme. A weapon system of vast new power comes on line [Moret says "on time"] and we didn't have an enemy worthy of it, so naturally, we use it on ourselves, wag the dog."

At 60:19 Webre states:

Just in these last couple of minutes, could you summarise why it is that it's taken now almost 8 to 9 years for the information to come out that HAARP was used at 9/11.

Moret reads a quote from Richard Cooke regarding the control of world affairs by bankers

As the 20th century advanced, the financier elite became heavily involved in getting rich off world war and the manufacture of the new weapons of mass destruction that modern technology made possible. Warfare and weaponry, combined with control of credit manufactured through the leveraging of industrial production, were to be the primary means of putting nations and their populations into debt.

Then Moret simply adds:

That's exactly what's happening to us now and they've used HAARP to carry out 9/11

Webre responds with “exactly”. Then he ends the broadcast saying

You can go to www.peaceinspace.org to listen to this program and the audio archives of all the programmes. There will be there as well a complete outline with references... listed throughout this programme.

Subject: COOPRADIO.ORG: ANALYSIS OF THE SCIENTIFIC AND TECHNICAL EVIDENCE FOR THE USE OF HAARP AND BEAM WEAPONS

To: alw@peaceinspace.com, leurenmoret@yahoo.com, peace@peaceinspace.org,
webre@shaw.ca

Date: Monday, December 15, 2008, 10:11 AM

Dear Alfred and Leuren,

The referenced presentation relied heavily on materials that are copyrighted, as noted in my website and as noted in the actual content of the Madison presentation, attended by both of you in the month of August, 2007. The materials are intended for 'fair use' by others and I certainly do not object to such use. What I do object to is the use of the materials without attribution of the source. Will you please contact both your email list and Coopradio.org and issue an attribution statement stating as follows:

"The materials presented are based largely on the work of Dr. Judy Wood and, in particular, upon a presentation of hers entitled "The New Hiroshima," originally presented at Madison, Wisconsin on August 4, 2007. The copyrighted presentations can be found here:

http://drjudywood.com/videos/Hiroshima_videos.html

as well as in the material from her site, drjudywood.com ."

I also request that any future presentation that relies on that material or other work of mine should also contain a proper disclosure of source.

Thank you in advance for your anticipated cooperation in these requests.

In friendship,

Dr. Judy Wood

To: alw@peaceinspace.com, peace@peaceinspace.org, webre@shaw.ca,

"Dr. Judy Wood" <lisa.judy@nctv.com>, bob.bobnichols@gmail.com

Dear Judy - Because I believe your information presented at Madison is one of the most important ones ever presented on 911, I have made every attempt to widely circulate awareness about your information. I don't need to steal anyone else's information, this is something quite different, it's actually a strategy to get your information out. I am aware of extensive harrassment and bashing that you have been subjected to, and I know all about it because it happens to me all the time, especially on the HAARP interviews I have already done prior to the one you are writing about.

I have done a previous interview on "HAARP and 911" with Alfred on another station in November, fully acknowledging your information and contribution. As soon as I mentioned your name in the interview as the starting point for my comments - the electricity was cut off in my house and the phone line went dead. Any time your name is mentioned in interviews, the same thing happens. The host for the program I mentioned is "Sofia" on Republic Radio, and she also turned on me and started viciously attacking after I made her shut up while I presented the information without interrupting me in a second interview because the first one was disrupted by turning off my electricity in the middle of the interview. She also tried to ask a series of distracting and disinfo questions which would have blocked my presentation on the air of the 911 evidence that HAARP and/or beam weapons were used.

My presentation is quite different from yours, because you have never suggested that HAARP or beam weapons were used at the WTC as far as I know. I have never heard any of your other presentations or seen your copyrighted material so I am unaware that you tied 911 to HAARP if you did in previous material.

Did you contribute a chapter to Jim Fetzer's 911 book he is putting together from our conference?

I think you like me are being heavily censored everywhere. The other HAARP interviews I have done are broadly dispersed across the internet, and there is a great deal of interest in them. I do not copyright my material because I want people to use it and write about it so that the correct information gets to the public. I give it to the public as a public service.

Leuren

The Baker Effect - A Rift and Disruption System

By Dr. Billy G. Gruff (Pseudonym)
[With Profuse Apologies to Mark A Solis](#)

People often ask, "What exactly is the Baker Effect?"

This brief essay is an attempt to answer that question to the satisfaction of the majority.

First of all, the Baker Effect is a collection of phenomena which appeared coincidentally in about Feb 2008, when research on the effects seen at the WTC on 9/11 was linked, by Dr Judy Wood, to the effects produced John Hutchison in his earlier experiments. (This took place in a broadcast on WPFW in Washington DC) In other words, the Baker Effect is not simply a singular effect. It is several.

The Baker Effect occurs as the result of interference in ongoing research - in a zone of controversy where only a few people (and even less scientists – arguably only one) are maintaining a focus on looking at evidence.

The effects produced include depression of the quality of discussion, attacking research figures of similar opinions - such as Dr Reynolds and Dr Wood, the anomalous bleating of anonymous forum posters (often “churning” through irrelevant material), spontaneous fracturing of judgement (some people support the Baker Effect’s known promotion of false information – including on Web Radio programmes), and seemingly temporary and permanent changes in the behaviour of those involved in 9/11 research.

The disruption of important research by the Baker Effect does not seem to be the result of simple disagreements over evidence. Claims that this reason alone can explain the phenomenon seem almost ridiculous, and are also seemingly disproved by looking at the time when the Baker Effect was initially observed - when it has become most active. The Baker effect has been documented on YouTube videos, and has been claimed to be a reproduction of the complete Hutchison Effect (it is not). The Baker Effect has resulted in a “Challenge” to John Hutchison, involving anomalous sums of money. Some people claim that John Hutchison has not accepted this challenge – even though evidence has been presented that he has.

The diffusion of the tendency to focus on evidence in research, which is exceedingly remarkable, indicates clearly that the Baker Effect has a powerful influence on reasoning. In a striking and baffling contradiction, previous conclusions over evidence presented in relation to what happened on 9/11 are “called into question” and a focus is shifted from this evidence to an individual’s trustworthiness – even when no new evidence has come to light about that individual. A researcher named Dr Wood can simply become the target of “anomalous attacks” – or accusations of “2 researchers being merged into one” can be made, yet Dr Wood has not “come apart”. Also, there is evidence of a misplacement of trust in the source of Baker Effect (Ace Baker) – as [promotion of false information](#) and the [notion of “viscous attacks” is discussed openly by this source, without any evidence that such attacks have ever actually taken place.](#)

The anomalous heating of forum discussions - without focusing on actual evidence - is a clear indication that the nature of this heat may not be completely natural. This has far-reaching

implications for the state of the “alternative knowledge” and 9/11 research communities, which often hinges on the presumption of a search for evidence and truth - without baseless accusations and endless vitriol being introduced. It should be noted that credibility of much of the Science which underpins our current level of technology depends on keeping knowledge of the Hutchison Effect properly hidden, and it seems the Baker Effect has this overall result. The anomalous heating of discussion exhibited by the Baker Effect shows plainly that we have much to learn about what lengths a secret group, with black technology, will go to keep this knowledge obfuscated or covered up completely.

The spontaneous fracturing of judgement, as occurs with the Baker Effect, is interesting for two reasons: (1) there is evidence of an "external force" causing the fracturing, and (2) the method by which the judgement is fractured can be painful to observe - the intellect simply "comes apart".

Some temporary changes in the personality structure and logical properties of opinions are somewhat reminiscent of the "truth bending" of Jim Fetzer, as he has been observed near the situation when the changes take place. One Baker Effect video shows juggling – like a circus act, yet people still take this phenomenon seriously. In the case of personality changes, a character will be “nice” at one end, like honey, and then “nasty” at the other end, like bitter lemon. Again, this could be evidence of a strong influence on personality by external forces.

The ongoing and seemingly timed interferences involved in producing these Baker effects are generated from as many as four or five internet radio and web sources, all operating at relatively low power. However, the zone in which the interference takes place is observed by many tens or even hundreds of forum posters and listeners.

It is surmised by some researchers that what Baker has done is tap into “Zero Trust Energy” – but it also seems to derive energy from internally generated spin. This energy gets its name from the fact that it is seen by oscillations in people’s views of prominent researchers, where it is assumed all honesty in a researcher ceases. The evaporation of trust is associated with a failure to keep focused on evidence – which could be a result of the Baker Effect’s spontaneous emission of negative feelings and an annihilation of careful analysis coming from what is called “the brain.” The density of the energy contained in the Baker Effect’s “truth vacuum” is estimated by some at 75 forum posts per hour, which is reportedly sufficient to boil off most peoples common sense and analytical abilities. Casual observers may wonder if this will result in “perpetual motion”, but with no useful work done.

Given access to such energies – part of the “Zero Trust Field”, it is small wonder that the Baker Effect produces such bizarre phenomena. At the present time, the phenomena are easy to reproduce with regularity – as several other figures seem to be doing. The focus for the future – for those wishing to cover up the truth about the 9/11 and energy connection is, then, first to increase the frequency of occurrence of “Baker Effects”, then to achieve some degree of precision in their control.

The work is continuing at this time. Before long, we shall see what progress can be made.
